Board of Directors - Regular Meeting San Simeon Community Services District AGENDA

Wednesday, October 9, 2002 – 5:30 PM Cavalier Banquet Room

Note: All comments concerning any item on the agenda are to be directed to the Board Chairperson

- 1. 5:30 PM CALL TO ORDER
 - 1.1 Roll Call
 - 1.2 Public Comment on Closed Session Items
- 2. ADJOURN TO CLOSED SESSION
 - 2.1 Personnel/General Manager Discussion Government Code Section 54957
 - A. Discussion regarding General Manager Contract
 - 2.2 Personnel/Employee Compensation Fiscal Year 2002/2003
 Conference with General Manager, the District's Designated Representative, for the purpose of reviewing the District's position regarding the terms and compensation paid to the unrepresentative employees and giving instructions to the Designated Representative.
- 3. RECONVENE IN OPEN SESSION (6:30PM)
 - 3.1 Roll Call
 - 3.2 Pledge of Allegiance
 - 3.3 Report on Closed Session
- 4. PUBLIC COMMENT:
 - Any member of the public may address and ask questions of the Board relating to any matter within the Board's jurisdiction, provided the matter is not on the Board's agenda, or pending before the Board.
 Presentations are limited to three (3) minutes or otherwise at the discretion of the Chair.
 - No Person shall be permitted to make slanderous, profane or personal remarks against any elected
 official, committee and/or staff.
 - 4.1 Sheriff's Report
 - 4.2 Public Comment
- STAFF REPORTS
 - 5.1 General Manager's Report
 - 5.2 Plant Superintendent's Report
 - 5.3 District Engineer's Report
- 6. ITEMS OF BUSINESS
 - 6.1 Approval of Minutes August 14, 2002
 - 6.2 Approval of Warrants August 1, 2002 August 31, 2002 & September 1 30, 2002
 - 6.3 Quarterly Investment Report
- 7. DISCUSSION/ACTION ITEMS
 - 7.1 Request for Authorization Letter to Proceed with Improvements (Russel)
 - 7.2 Resolution Support of Proposition 50 Water Bond Initiative
 - 7.3 Preliminary Fiscal Year 2002 2003 Budget
 - 7.4 General Manager's Contract
 - 7.5 Purchase Order No. 1247 Fiberglass Safety Grating
 - 7.6 Outfall Line Repair Payment Authorization
 - 7.7 Authorization to Solicit Proposals for Water Rate Study
 - 7.8 Board Committees
 - 7.9 Board Reports
- 8. BOARD/STAFF GENERAL DISCUSSIONS AND PROPOSED AGENDA ITEMS
- 9. ADJOURNMENT

MEMORANDUM

DATE:

October 9, 2002

TO:

Board of Directors

FROM:

Mark A. Bloodgood, General Manager

RE:

General Manager's Report

- 1. Public Broadcasting of Board Meetings No update.
- 2. Internal Controls Program and Office Procedures No update.
- 3. **Budget Preparation for 2002-2003** To be discussed under Discussion/Action Item number 7.3.
- 4. Facilities Plan/Wastewater Treatment Plant Ongoing to be reported in District Engineer's report.
- 5. **Completion of the Action Plan** We cancelled the October 7, 2002 date when two board members were unable to make the meeting. 100% participation should be the rule for this session. The Plan is very important for the future of the District.
- 6. **Discussions with Roger Lyon, Council for the Hearst Corp.** Paul Reichardt and Mark Bloodgood meet with Roger Lyon in September to talk about the District being able to again use the Hearst Ranch well as an emergency backup, dealing with the fencing requirements around our regular wells, and other topics related to the District. Mr. Lyon will be talking with Marty Cepkauskas and others at the Hearst Corporation and will report back with us.
- 7. **Financial Statements** The audit of the District's financial statements is currently underway by the firm of Crosby and Cindrich. This is the third year of their three-year contract. The Quarterly Investment Report for the period ending 6/30/02 will be presented under Items of Business (Item 6.3)
- 8. Research into Insurance Deductible Question Director Kiech and a few community members had questioned Management's decision not to submit a claim to our insurance carrier for the auto accident involving the District truck and

Ms. Putnam's car. Specifically the question came up regarding Warrant No. 0207-034 for \$865.13 to San Luis Autobody. Director Kiech had asked the District's Auditor be contacted to verify that not submitting the claim was acceptable. Staff did this and also contacted the District's insurance agent and two other independent insurance agents. All agreed that not submitting the claim was the correct action.

9. **Use of the District Truck -** Director Kiech had voiced concern to the District Manager regarding the District Truck being seen in Cambria on three separate occasions at various times. Mr. Kiech and others in the community have raised this concern on numerous other occasions. Management had previously requested the plant operators to make sure that they logged their mileage. They have done this since May of 2001. There have also been strong feelings voiced about the District truck being taken home overnight to the Superintendent's house when he is on call for the District, since the Superintendent has moved his residence from Cambria to a more remote location.

Staff researched this matter. Regarding the three incidents first mentioned, per the log being kept by District personnel, the truck was in Cambria at the specific times listed by Mr. Kiech, when the plant operator, Michael Hassett, had taken the truck during business hours to go to lunch. In addition, Management discovered that the truck was not being driven to Mr. Head's residence but was, in fact, being parked at his mother's house in Cambria. According to Mr. Hood, this was being done in order to limit the number of miles being driven on the truck and to get the vehicle away from the effects of the ocean air at the plant.

Further research has indicated that for the current calendar year, the truck is being driven an average of 47 miles per day. In addition, it was discovered that plant personnel use their own vehicles 11% of the time, instead of the District truck, on District business. In reviewing the policy currently in affect with the District none of this appeared to be out of line. Management suggests that the Policy Committee make this a high priority to review the policy, solicit Board input, and make any changes desired.

SUPERINTENDENT'S REPORT AUGUST 2002

COMMENTS:

In light of the current peak tourist season, we decided to delay interrupting water service to install replacement meters at the various motels, until next month.

The price quote for Sodium Hypochlorite and Sodium Bisulfite from LA Chemical was received. They should be approximately \$5,000.00 less a year than our current supplier, Basic Chemical.

SUPERINTENDENT'S REPORT FOR SEPTEMBER 2002

Connected alarm system to blower.

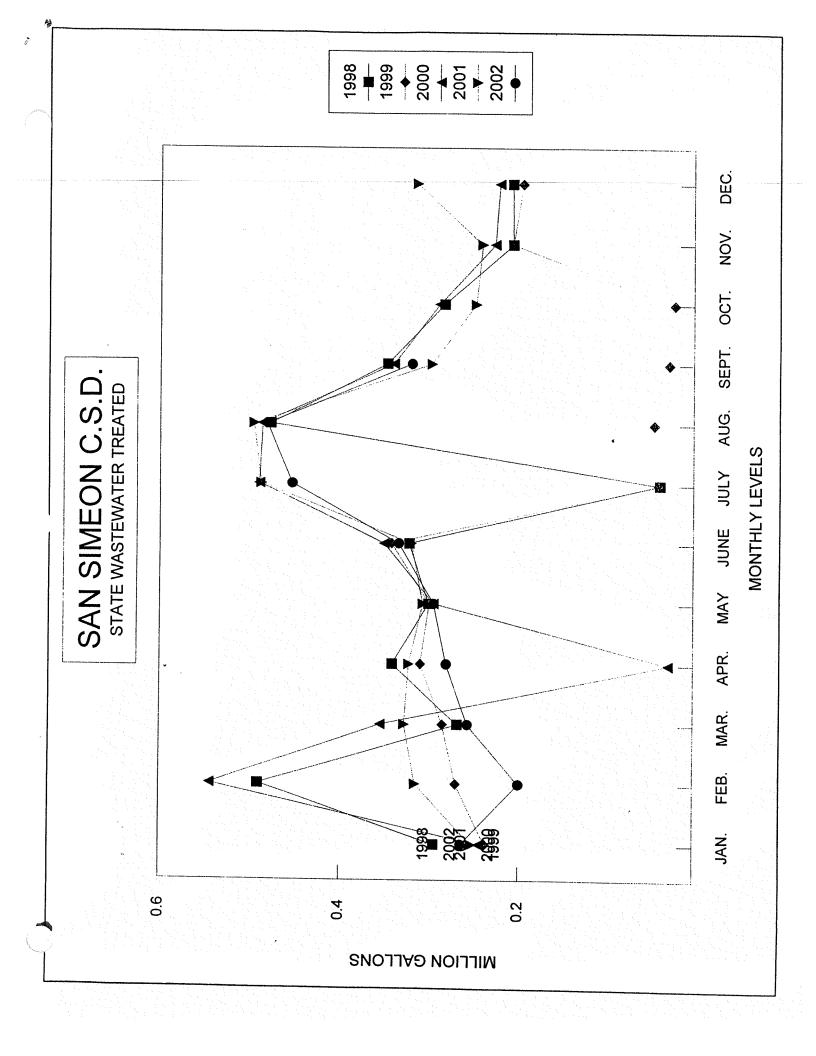

Ordered new splitter box for treatment plant to control flow to each plant.

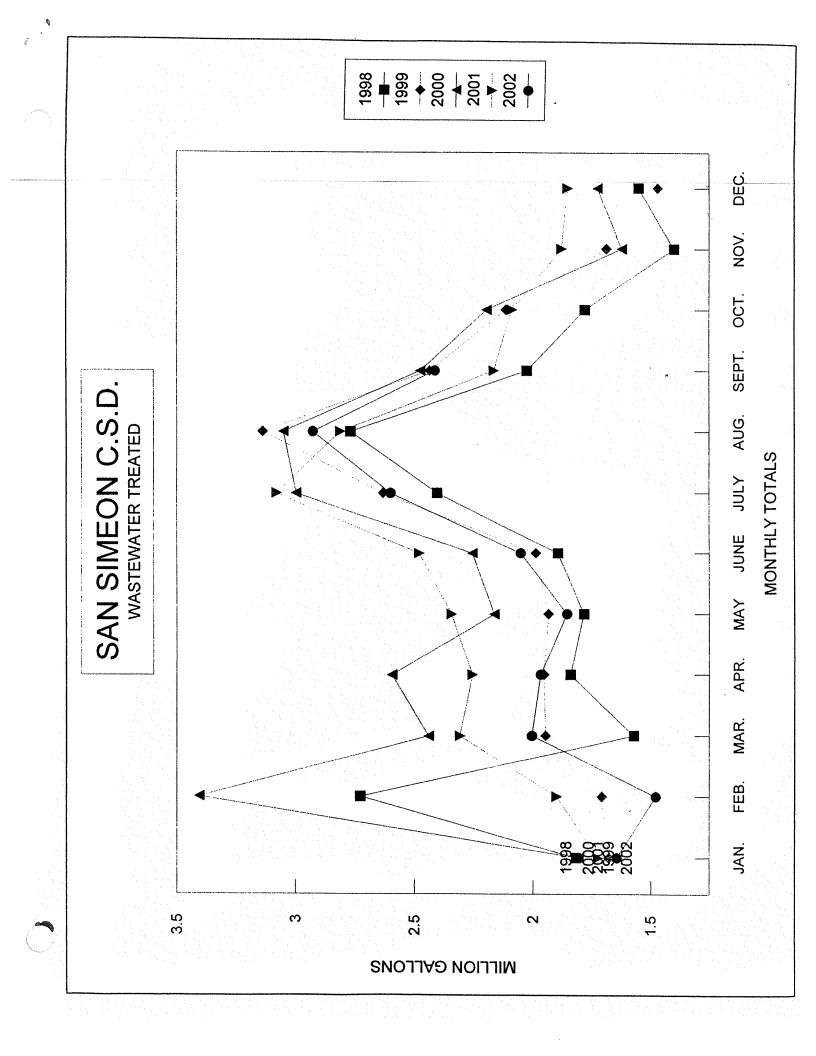

Drained and cleaned treatment plant #4 for inspection.

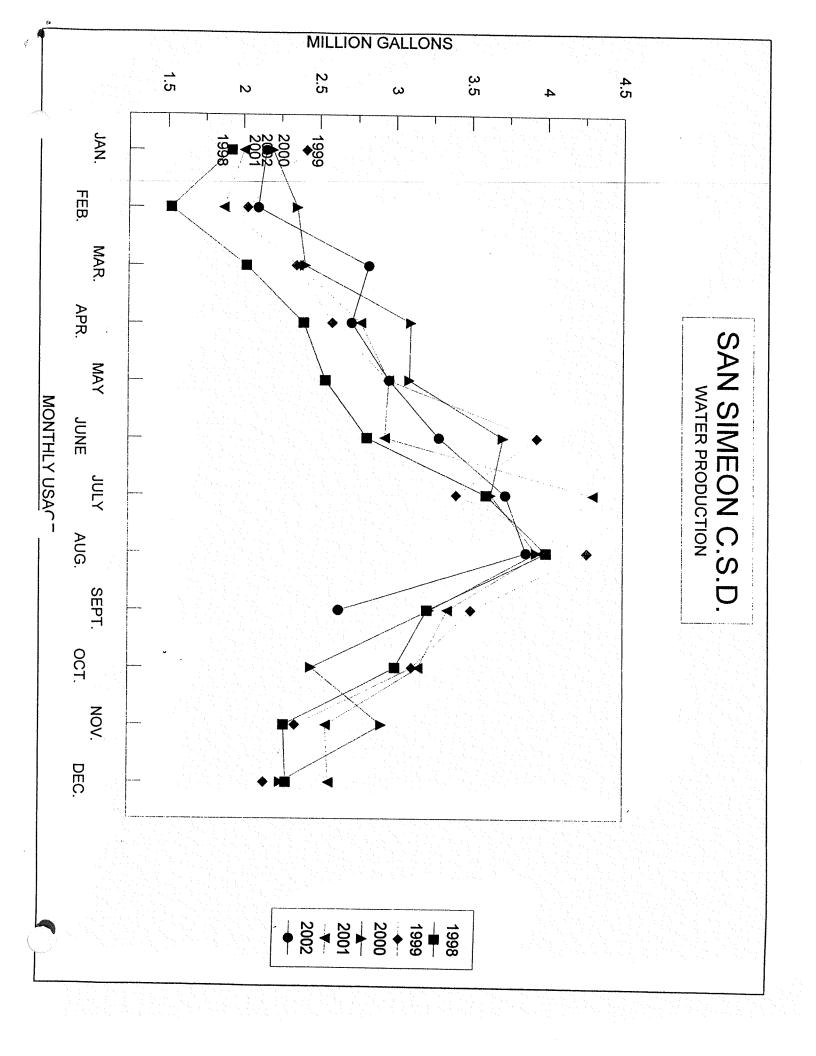

Replaced meter #1011 with compound meter.

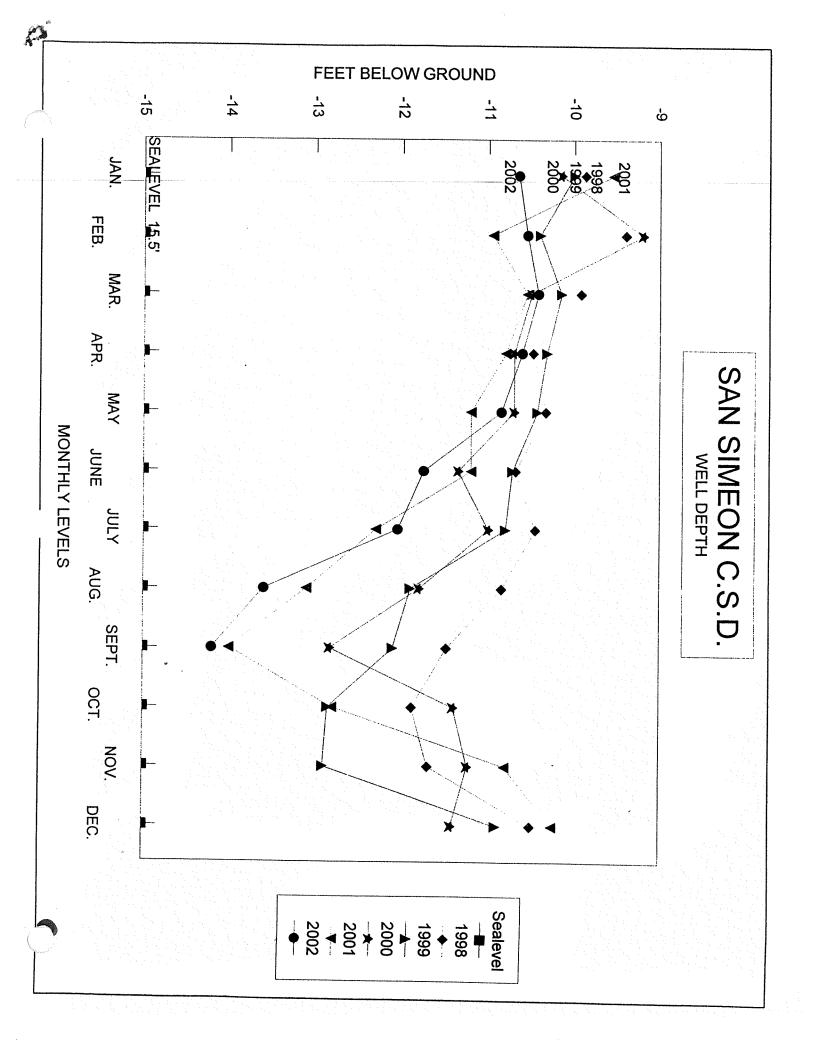

LA Chemical started this month as our new supplier of sodium hypochlorite and sodium bisulfit.

111 Pico Avenue San Simeon, California 93452 (805) 927-4778

DATE:

September 11, 2002

TO:

Board of Directors

VIA:

Mark Bloodgood, District Manager

FROM:

John L. Wallace, District Engineer

SUBJECT:

Engineer's Report - Project Status

SUMMARY OF ACTIVE PROJECTS:

1. Temporary Odor Control - Status

- 2. Air Piping Replacement Completed
- 3. Avonne-Castillo Loop On Hold
- 4. Annual Road Improvements Contract package being prepared.
- 5. Capital Improvement Project List/Descriptions and Estimated Costs FY 02/03 Ongoing.
- 6. Pico Creek Wells Flood proofing Included in Proposed FY 2002-03 Budget.
- 7. Standby Power Included in Facilities Plan
- 8. Wastewater Treatment Plant Riprap Coastal Permit being submitted
- 9. State Revolving Fund Loan Application made.
- 10. Facilities Plan: Next draft available in September, 2002

DISCUSSION:

1. Odor Control;

The odor control chemical feed system is now being used concurrent with the use of the equalization basin. Kennedy/Jenks Consultants has reviewed the odor control project and has made recommendations in light of the future plans for the equalization basin.

2. Air Line Replacement Project;

Completed--the statutory 30 day lien period expired August 25, 2002.

3. Avonne - Castillo Waterline Loop;

Staff has been directed to postpone solicitation for bids on this project and to proceed with the higher priority water line project (line to storage tank).

4. Annual Road Improvements (Avonne Avenue and Otter Way);

Staff continues final street design in accordance with the soils engineer recommendations that identifies both reconstruction and overlay design criteria for this project.

5. Capital Improvement Projects Priority List;

(See Proposed Fiscal Year 2002 - 2003 Budget)

6. Pico Creek Wells;

No further updates at this time, improvements are to be included in the Proposed FY 2002-03 Budget.

7. Emergency Standby Power;

The final recommendations for the type and capacity of standby power will be made by Kennedy/Jenks Consultants as part of the facilities plan recommendations.

8. Wastewater Treatment Plant Rip Rap-- Coastal Commission Notice of Violation

Staff has prepared a Coastal Development Permit Application (CDP) and is submitting it to the County. An exhibit of a field survey which showed the boundary between County and State jurisdiction was previously prepared and submitted to both the County and the State. The project lies in County jurisdiction.

9. State Revolving Fund (SRF) Program;

Staff investigated potential loan funding for wastewater projects through the State Revolving Fund which provides loans at a low interest rate (approximately 2.5 to 3%). Because of the potential to construct several different improvements with SRF funds, a "general project" application was submitted as a "place holder" for the SWRCB to consider. San Simeon has been placed on the draft State-wide priority list for funding. A project application will be submitted in accordance with Facilities Plan recommendations and the Proposed FY 2002-03 Budget.

10. Facilities Plan:

The facilities plan is being completed. A preliminary draft report was provided in July for review. The Facilities Committee reviewed the draft several times and comments from the Chamber of Commerce have also been sent to KJC. The final draft report is anticipated to be provided for review in September. The Facilities Plan will address the following projects previously considered by the Board:

1. Equalization Basin Conversion;

Kennedy Jenks is reviewing alternatives to modify and improve the operation of this EQ basin, and recommendations will be incorporated into the overall facilities plan.

2. Recycling Water Supply;

The study was completed in August 2001, and grant reimbursement of 50% of the cost of the study has been received. Further refinement of an acceptable project and a determination of property owners willing to take the water should be done following the development of the Facilities Plan. The anticipated first phase of the water recycling project is included in the FY 2002-03 budget.

3. Safety Projects;

The grating replacement project is scheduled for Board consideration on September 11th. Additional projects are to be identified as part of the Facilities Plan.

4. Shop / Storage Building;

Recommendations for the building will be addressed as part of the Facilities Plan. No further update at this time.

111 Pico Avenue San Simeon, California 93452 (805) 927-4778

DATE:

Mark Bloodgood, District Manager

FROM:

John L. Wallace, District Engineer

SUBJECT:

Engineer's Report - Project Status

SUMMARY OF ACTIVE PROJECTS:

- 1. Temporary Odor Control Status
- 2. Air Piping Replacement Completed
- 3. Avonne-Castillo Loop On Hold
- 4. Annual Road Improvements Contract package being prepared.
- 5. Capital Improvement Project List/Descriptions and Estimated Costs FY 02/03 Ongoing.
- 6. Pico Creek Wells Flood proofing Included in Proposed FY 2002-03 Budget.
- 7. Standby Power Included in Facilities Plan
- 8. Wastewater Treatment Plant Riprap & Aeration Tank Expansion-Coastal Permit
- 9. State Revolving Fund Loan Application made.
- 10. Facilities Plan: Next draft available in October, 2002

DISCUSSION:

1. Odor Control;

The odor control chemical feed system continues to be used as originally installed, with chemical feed at the Hearst lift station. Kennedy/Jenks Consultants has reviewed the odor control project and has included recommendations in the draft facilities plan in light of the future plans for the equalization basin. There have not been odor complaints at the treatment plant as of recent.

2. Air Line Replacement Project;

Completed--the statutory 30 day lien period expired August 25, 2002. Superintendent Head is in the process of replacing two 30 HP blower motors.

3. Avonne - Castillo Waterline Loop;

The Board has decided to postpone solicitation for bids on this project and to proceed with the higher priority water line project (line to storage tank).

4. Annual Road Improvements (Avonne Avenue and Otter Way);

Staff continues final street design in accordance with the soils engineer recommendations that identifies both reconstruction and overlay design criteria for this project.

5. Capital Improvement Projects Priority List;

(See Proposed Fiscal Year 2002 - 2003 Budget)

6. Pico Creek Wells;

No further updates at this time, improvements are to be included in the Proposed FY 2002-03 Budget.

7. Emergency Standby Power;

The final recommendations for the type and capacity of standby power will be made by Kennedy/Jenks Consultants as part of the facilities plan recommendations.

8. Wastewater Treatment Plant Riprap & Aeration Tank Expansion-Coastal Permit

Staff has prepared a Coastal Development Permit Application (CDP) and submitted it to the County on September 24, 2002. A field survey showing the boundary between County and State jurisdiction was previously prepared and submitted to both the County and the California Coastal Commission. The California Coastal Commission are still reviewing this document. Through the processing of the rock rip rap project, the 1985 Coastal Permit has resurfaced. Staff is preparing a response to the California Coastal Commission requesting information regarding the completion of the conditions to the 1985 permit.

9. State Revolving Fund (SRF) Program;

Staff investigated potential loan funding for wastewater projects through the State Revolving Fund which provides loans at a low interest rate (approximately 2.5 to 3%). Because of the potential to construct several different improvements with SRF funds, a "general project" application was submitted as a "place holder" for the SWRCB to consider. San Simeon has been placed on the draft State-wide priority list for funding. A project application will be submitted in accordance with the final Facilities Plan recommendations and the Proposed FY 2002-03 Budget.

10. Facilities Plan:

The final draft Facilities Plan has been completed by Kennedy Jenks, and is under review by the Facilities Committee. Kennedy Jenks incorporated preliminary draft comments provided by the Facilities Committee and staff. It is anticipated that Mr. Jenks will make a full presentation to the Board at it's November meeting.

A. Equalization Basin Conversion;

Recommendations have been incorporated into the draft Facilities Plan.

B. Recycling Water Supply;

Refinement of an acceptable project and a determination of property owners willing to take the water should be done following the development of the Facilities Plan. The anticipated first phase of the water recycling project is included in the FY 2002-03 budget.

6.

C. Safety Projects;

The grating replacement project is scheduled for Board consideration on October 9th. Additional projects are to be identified as part of the Facilities Plan.

D. Shop / Storage Building;

Recommendations for the storage building will be addressed as part of the Facilities Plan. No further update at this time.

REGULAR BOARD OF DIRECTORS MEETING SAN SIMEON COMMUNITY SERVICES DISTRICT

Date: Wednesday, August 14, 2002
Place: Cavalier Banquet Room

MINUTES

1.0 CALL TO ORDER

The Board convened at 5:30 p.m.

1.1 Roll Call:

Directors Present: Carol Bailey-Wood, Loraine Mirabal-Boubion, David Kiech, Bob McLaughlin and Eric Schell

Staff Present: District Manager Mark Bloodgood, Assistant District Manager Eileen Putnam, District Counsel Robert Schultz

1.2 Public Comment on Closed Session:

There were no comments.

2.0 ADJOURN TO CLOSED SESSION

A motion was made by Director Bailey-Wood and seconded by Director Mirabel-Boubion to adjourn to closed session for Personnel/General Manager Discussion – Government Code 54957 – Discussion regarding the General Manager Contract and Conference with the General Manager, the District's Designated Representative, for the purpose of reviewing the District's position regarding the terms and compensation paid to the unrepresented employees and giving instruction to the Designated Representative. Motion carried unanimously.

3.0 RECONVENE IN OPEN SESSION/CALL TO ORDER

The Board re-convened in open session at 6:30 p.m.

3.1 Roll Call:

Directors Present: Directors Carol Bailey-Wood, Loraine Mirabal-Boubion, David Kiech, Bob McLaughlin and Eric Schell.

Staff Present: District Manager Mark Bloodgood, Assistant District Manager Eileen Putnam, District Engineer John Wallace and District Counsel Robert Schultz.

- 3.2 Pledge of Allegiance Led by Chairperson Bailey-Wood
- 3.3 Report on Closed Session:

District Counsel Schultz reported that the Board met in closed session for the purpose of discussing the General Manager's Contract and for conferencing with the General Manager, who serves as the Designated District Representative, to review the District's position regarding the terms and compensation paid to the un-represented employees and giving instructions to the Designated Representative. No action was taken.

4.0 PUBLIC COMMENT

4.1 Public Comment:

The subject of obstruction of the fire hydrant, parking issues and littering on Balboa Avenue was presented. Staff had been made aware of the situation and took steps to address residents concerns, including painting the curb to indicate no parking, speaking with surfers regarding the need to pick up

their trash, and contacting the Sheriff's Department to request additional patrols in the area. Another matter presented by the public related to complaints about the noise, speeding, loitering, and debris in and around the Courtesy Inn – rear area. Lt. Basti addressed the matter by stating that residents should direct their concerns to Supervisor Shirley Bianchi. Additionally, residents noting any disturbances and or violations should contact the Sheriff's Department immediately. However, Administration of Code Enforcement is not within the jurisdiction of the Sheriff's Department. A concerned resident presented photos of graffiti, which had been exposed when management of the Inn cleared green waste and debris, the representatives of the Sheriff's Department. Director Schell also raised the point that the evening dispatch at the Sheriff's Department is a problem. Discussion followed.

4.2 Sheriff's Report:

Deputy Todd Steeb gave the Sheriff's Report. With regards to the matter of evening dispatch, should residents encounter problems, they should call Lt. Basti and he will contact Deputy Steeb. The Deputy also stated that he and his partner plan to be proactive, and to make their presence known in the area. He indicated that he has already made contact with management at the Courtesy Inn and will attempt to facilitate a satisfactory resolution. Deputy Steeb also reiterated that he is working with staff regarding the concerns of Balboa Avenue residents. Finally, he reiterated that he will do everything possible to assist with the noise, loitering and speeding problems in the Avonne Avenue area.

5.0 STAFF REPORTS

5.1 General Manager's Report

Mr. Bloodgood reported that staff is looking into available water conservation education material for broadcast within the District. The August 5th Strategic Planning Session was postponed and that slot was utilized for a Budget Workshop. Robert Rauch is available to facilitate a planning session in October, preferably October 7th. Representatives of Hearst Corporation had to re-schedule our meeting of August 15th. The purpose of this meeting will be to work out details for using the Hearst Ranch well as an emergency backup, addressing the fencing requirements around the District's existing wells and other topics related to the District. Management did have a meeting with Kirk Sturm - Director -Superintendent of Hearst Castle, and discussed several issues, including participation in the infrastructure upgrade, billing adjustments, recycled water and other mutual concerns. Mr. Sturm is also helping our efforts to establish a means for gaining access to an emergency backup generator via the County Office of Emergency Services. A packet of information outlining these items has been forwarded to State Parks staff for review and feedback. The information has also been sent to elected representatives. The District secured its domain name and the web site will be moved to its new location and will be available for viewing on Monday. The address is http://www.sscsd.org. Staff obtained quotes for new water conservation signs and passed the information on to the Chamber of Commerce for review. The hope is that they will contribute to the cost of the new signs. The District will continue its efforts to work jointly with the Chamber. Staff and Board Members expressed disappointment that they did not receive any information about the Chamber's Cleanup Day. Chamber President Lambeth apologized, and stated he would provide a lead time of 30 day's notice next time. In regards to weed abatement, the program is complete and that payment had been received from the estate of one property owner whose lot the District had cleared. Finally, Mr. Bloodgood stated that financial statements would be made available to the Board members on a regular basis. The Investment Report for the period ending 6/30/02 will appear on the September agenda.

5.2 Plant Superintendent's Report

Mr. Wallace gave the Superintendent's Report, indicating that usage and flows reflected a slight decrease. The well depths are being closely monitored and today, the level was 12.61. The chloride levels are at acceptable levels. The compound meters have been received and, while the Courtesy Inn shut off their water on July 23rd for repairs, staff replaced their old water meter with the new compound meter. The EQ tank was bypassed for cleaning. Al's Septic pumped the grit out of the bottom of the chamber. On the

evening of July 29th, staff responded to a call regarding a water leak at 555 Pico Avenue. The contractor clearing the weeds ran over the water line on the customer's side of the meter. Staff responded and assisted with making the necessary repairs. The new Dissolved Oxygen probes are installed and operating with the VFD to control the blower speed, thereby holding a constant DO level in the treatment plant. Staff also installed a High Efficiency (93%) 60hp motor on blower #4. Director Kiech asked why the 60hp motor had been replaced. Staff indicated that the Board had received been notified in a past staff report that the old motor could not be connected to the new VFD's during the airline project, and that it needed to be replaced. Director Kiech stated he thought staff was going to wait for the Facilities Plan before replacing any equipment at the plant. He stated that his desire had been to replace the 60hp with a smaller motor since the plant didn't need that much power to run. Michael Hanchett made reference to a statement in the initial Draft of the Kennedy Jenks report that said the plant can operate on 37hp and said that staff should not replace anything else until the Facilities Plan is completed. Mr. Bloodgood stated he would research this. Quotes for the new fiberglass grating around the EQ are still being solicited. Finally, staff has begun painting the fire hydrants in the community. The curbs near the hydrants will also be red striped to indicate No Parking Areas. In response to questions regarding the difference between Gross Water Production and Net Water Production, Mr. Wallace indicated that the discrepancy might be due to the number of days included in the meter readings. The well meters may be read on a different day than the water meters. Staff will look into this.

5.3 <u>District Engineer's Report</u>

District Engineer Wallace stated that the odor control chemical feed is now being used concurrent with the use of the equalization basin. Kennedy Jenks will be including recommendations in light of future plans for the EQ basin. The final corrections have been made and the DO sensors have been replaced and are linked to the operations of the blowers. The Contractor has completed the work and a Notice of Completion has been filed with the County Recorder's office. The statutory lien period expires 8/25/02. Mr. Wallace indicated that a revised schedule for construction of the Avonne Castillo Waterline loop was being coordinated with Accor/Motel 6. A brief discussion was held regarding the need for this project and the benefit of increased fire flow that will result from completion of the looping projects. The question of whether the easement had an expiration date was also raised. Staff will look into this. Discussion continued with the consensus being that all work on this project should be suspended until the final determination of what projects were to be considered priority for FY 2002-03 is complete. Mr. Wallace reported that coordination with the Soils Engineer continues with regards to the road repair project for Avonne Avenue and Otter Way. As reported before, final recommendations relating to the emergency generator for the plant will be made by Kennedy-Jenks in their report. In regards to the Coastal Commission-WWTP Riprap issue, Mr. Wallace explained the history of the situation, and that staff had been working on the issue of which agency the District needed to file a permit with. With the determination of the Mean High Tide now completed, it is clear that the survey shows the riprap is well above the Mean High Tide. As a result, staff will schedule a meeting with Coastal and County staff to review the information and will also commence with the application process with the County. Staff is also researching potential loans funding for wastewater treatment projects via the State Revolving Fund Program. Finally, Mr. Wallace reported that staff is continuing to work with Kennedy-Jenks and the Facilities Advisory Committee on reviewing the initial drafted chapters of the Facilities Plan. Chapter 5 should be forthcoming.

6.0 ITEMS OF BUSINESS

6.1 Approval of Minutes – July 10, 2002:

A motion was made by Director Mirabel-Boubion and seconded by Director McLaughlin to approve the minutes of July 10, 2002. The motion carried unanimously.

6.2 Approval of Warrants – July 1, 2002 through July 31, 2002

A question regarding Warrant No. 0207-009 for Weed Abatement (\$550) and why it was higher than last year was raised. Staff indicated that this encompassed all of the District's usual clearing in addition to the

overgrowth on Pico Avenue that had been discussed at prior meetings. Since this was a right of way issue and the District's responsibility, Mr. Rice cleared the overgrown bushes that were obstructing the roadway. The cost also included the clearing of the Goshgarian lot. This cost, with the specified 10% markup, was billed to the trustees of the property and their payment has been received. Director Kiech asked about Warrant No. 0207-034 (\$865.13) to San Luis Autobody for bumper repair, and whether this should this have been submitted to the District's Insurance Carrier for processing. Director Kiech was reminded that he and other members of the Budget Committee were present & meeting at the District Office when the accident occurred, specifically the district truck was accidently backed into Ms. Putnam's car. Staff explained that the District has a \$500 deductible and that submitting the claim would adversely affect the District's premiums and rating. Director Kiech requested that the District's Auditor be contacted to verify that not submitting the claim was acceptable. A motion was made by Director Mirabel-Boubion and seconded by Director McLaughlin to approve the Warrants for July 1 through July 31, 2002. Motion carried unanimously.

7 DISCUSSION/ACTION ITEMS

7.1 Ordinance No. 96 - Relating To Mandatory Water Conservation Restrictions

District Counsel Schultz recapped the discussion at the July meeting, where the Board had requested more stringent penalties for violations to the Water Restrictions. Mr. Schultz had reviewed other agencies policies. As a result, fines were included in the Ordinance. A discussion followed, and it was pointed out that Counsel had inadvertently omitted two restrictions: 1) that all outdoor irrigation of vegetation with SSCSD water shall be prohibited and 2) the washing of automobiles, trucks, trailers, boats, mobile homes and other types of mobile equipment with SSCSD water is prohibited. The penalties were also discussed, and the consensus was that they should be listed as follows: 1st Offense is an infraction and a Warning will be issued; 2nd Offense is a misdemeanor with a \$100 fine; 3rd Offense is a misdemeanor with a \$250 fine; and the 4th offense shall result in discontinuance of water service. Cooperation will be the key to success. A motion was made by Director Kiech and seconded by Director Schell to adopt Ordinance No. 96 declaring a Water Emergency within the District, repealing Ordinance No. 95, and re-establishing a Comprehensive Water Conservation Plan, with the above amendments to be included in the Ordinance. A roll call vote was held with Director's Kiech, McLaughlin, Schell, Mirabel-Boubion and Bailey-Wood all voting in the affirmative. Motion carried unanimously. The information will be disseminated to the press, residents and businesses of San Simeon, and will be posted in various locations throughout the District. The information mailed to residents will be bi-lingual.

7.2 Preliminary Fiscal Year 2002 – 2003 Budget

Mr. Bloodgood reported that staff is still compiling information on cost saving strategies for the FY 2002-03 Budget. Mike Hanchett indicated that we is concerned the Board is not dealing with Capital Improvements correctly, and that they need to be dealt with in a different manner. He also stated that he felt Zero Based Budgeting was not used correctly. As for Employee Compensation and any Cost Of Living Adjustments that may be considered, he would like to know what Index is being utilized. He recommended a review of the staffing patterns at the wastewater plant, a switch to bi-monthly billing, and potentially closing the office and outsourcing the accounting/administration. Terry Lambeth suggested that the District should look at the cost of outsourcing the office duties and look at the implication of such action over time. Mr. Bloodgood replied that every one of these items, in addition to other potential cost savings strategies, had already been raised by the Budget Committee and/or members of the Board and were being reviewed as part of the budget process.

7.3 **Board Committees**

Water Committee: Met on August 7th and discussed two topics. In regards to water recycling, the committee would like to enter into discussions with the State Parks regarding the possibility of providing recycled water to the Visitor's Center. The committee would also like to develop a database with an

inventory of the current water. The recommendations of the committee are to 1) direct the General Manager/Paul Reichardt to write a letter of introduction to the State Parks Superintendent regarding the possibility of providing recycled water to the Visitor's Center and 2) to direct the Budget Committee to allocate \$5,000 in the FY 02-03 Budget for development of a Water Inventory. Director Bailey-Wood made a motion to accept the recommendations of the Water Committee. The motion was seconded by Director Kiech, and the motion passed unanimously. The Water Committee's next meeting is scheduled for September 4th.

Budget Committee: No Report

<u>Policy Committee</u>: A meeting will be scheduled. The CSDA Sample Policy Book has been purchased. District Counsel Schultz will be working with the Committee after September 1st, when he is officially on a monthly retainer.

<u>Facilities Committee</u>: The Facilities Committee has reviewed the initial draft of the first four chapters of the Kennedy Jenks Report and submitted their comments to Mr. Jenks. The Chamber Advisory committee also submitted their comments to Mr. Jenks for consideration. The Committee is awaiting initial drafts of the last two chapters, which will include Kennedy Jenks recommendations.

7.4 Board Reports

Director Bailey-Wood gave a brief report on the last North Coast Advisory Committee meeting.

- 7.5 Robert's Rules of Order and Orderly Conduct At Meetings
 Sample information of was provided to the Board of Directors for review. This matter was referred to the Policy Committee for review. The Policy Committee can then formulate a recommendation for the Board to consider.
- 8 BOARD/STAFF GENERAL DISCUSSIONS AND PROPOSED AGENDA ITEMS
- 9. ADJOURNMENT

The meeting was adjourned at 7:45 P.M.

Mark Bloodgood, General Manager

FROM:

Paul E. Reichardt, Assistant General Manager

SUBJECT:

Request for Will Serve Letter

RECOMMENDATIONS:

Staff recommends the Board;

1. Review the attached request from David Brown regarding the Russel property.

2. Authorize staff to respond to Mr. Brown's request with the contingencies outlined below.

DISCUSSION:

The Board has received a request from David M. Brown, on behalf of his client, John Russel, regarding proposed renovations on the property located at 555 Pico Avenue in San Simeon. Mr. Russel wishes to remodel the house located at this address. Prior to issuing a permit, the County of San Luis Obispo requires a letter from the District affirming that this project meets with the District's approval and that it is in compliance with the current moratorium relative to water and sewer connections.

Upon initial receipt of Mr. Brown's request, staff contacted him to request copies of both the existing and proposed floor plans. Having reviewed these sketches, it is staff's opinion that the Board could direct staff to draft a letter outlining approval contingent upon;

- 1. Full compliance with the District's Ordinance No. 66 relative to the moratorium on the issuance of Water and Sewer connections within the District.
- 2. Submittal of three (3) full sets and one (1) reduced set of construction documents which will allow staff to review and determine whether the project is in full compliance with District Ordinance.

WHEN SUBMITTING

J:\Eileen\Eileen\San Simeon\Memos\David Brown Request 10-9-02.wpd

DAVID M. BROWN

August 28, 2002

Ms. Carol Baily-Wood Chair, Board of Directors San Simeon Community Services District 111 Pico Avenue San Simeon, Ca. 93452

Dear Chairwoman Baily-Wood:

I am contacting you on behalf of Mr. John Russel who recently purchased the property at 555 Pico Avenue in San Simeon Acres.

Upon his retirement as a teacher in Missouri, Mr. Russel intends to move here and live in this house as a full time resident. Consequently, he wants to make some modifications to the house that would require a permit from the San Luis Obispo County Planning and Building Department. These modifications include the remodel of both the interior and the exterior of the existing 785 square foot residence.

The interior work will include modification to the layout of the rooms within the building on a like for like basis. No new rooms or plumbing fixtures will be added, except that all of the replacement fixtures will be of the low flow, water saving variety.

The exterior work will include the addition of new doors and windows; construction of perimeter walls and foundation to bring the structure up to code; structural modification to meet current earthquake and energy standards (currently, the house is single board wall construction without any insulation); and, roof replacement with a Class A fire rated material and siding replacement with rock and Hardishingles (a fiber-cement product).

We believe that the limited scope of this project is allowed as set forth in your moratorium on water and sewer connections. We request that your board provide a letter verifying that fact so that Mr. Russel may begin processing his permit.

Thank you for your time and consideration.

Sincerely,

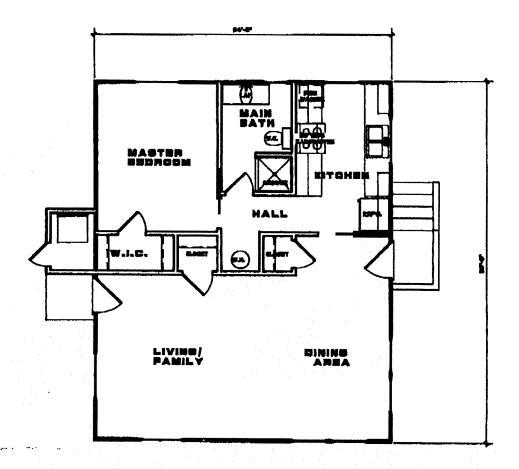

David M. Brown Architect-Agent

ORDINANCE NO.

AN ORDINANCE OF THE BAN SIMBON ACRES
COMMUNITY SERVICES DISTRICT CONTINUING A MORATORIUM
ON THE ISSUANCE OF WATER AND SEWER CONNECTIONS WITHIN
THE BOUNDARIES OF THE DISTRICT

BE IT ORDAINED by the Board of Directors of the San Simeon Acres Community Services District ("District") as follows:

SECTION 1. FINDINGS.

The Board of Directors of the District does hereby find, determine, and declare as follows:

- A. There currently exists a serious water quality and quantity problem within the boundaries of the District;
- B. There currently exists a moratorium on new sewer and water connections within the District originally established by Ordinance No. 61 and extended by Ordinance No. 63 to April 1, 1988. The intent of the Board of Directors by this Ordinance is to keep in effect said moratorium after the April 1, 1988, expiration date of Ordinance No. 63;
- C. The water quality and quantity problems of the District pose a current and immediate threat to the health and safety of the people within the District;
- D. The granting of additional water and sewer connections within the District contrary to the provisions of this ordinance would result in an immediate threat to the public health and safety;
- E. The District is diligently pursuing long term supplemental water supplies, but until the time when such supply is available, it is necessary to continue the existing moratorium.

SECTION II. MORATORIUM ON WATER AND SEMER CONNECTIONS.

Except as provided in Section IV of this Ordinance, the District shall shall not allow water and sewer connec-

of the District to serve any of the following:

- 1. Any new structure that will require new water
- 2. Any expansion of an existing structure that will incorporate additional plumbing fixtures; or
- 3. Any expansion of an existing structure that water or sewer.

SECTION III. DURATION OF MORATORIUM.

The provisions of this Ordinance shall remain in effect until repealed. This ordinance supersedes Ordinance No. 63.

SECTION IV. VESTED RIGHT EXEMPTION. The prohibition on new sewer or water connections provided in Section II of this Ordinance shall be inapplicable to projects receiving a vested rights exemption pursuant to Section 4 of District Ordinance No. 65.

SECTION V. CONSTITUTIONALITY.

If any section, subsection, sentence, clause, phrase or portion of this Ordinance is for any reason held to be invalid or unconstitutional by a Court of competent jurisdiction, such decision shall not affect the validity or the constitutionality of the remaining portions of this Ordinance. The Board of Directors of the District hereby declares that it would have passed this Ordinance and each section, subsection, sentence, clause, phrase or portion thereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, phrases or portions be declared invalid or unconstitutional.

SECTION VI. EFFECTIVE DATE OF ORDINANCE.

This Ordinance shall be in full force immediately upon passage and within fifteen (15) days thereof shall be

published at least once in a newspaper of general circulation in the County of San Luis Obispo, California.

INTRODUCED, PASSED AND ADOPTED at a regular meeting of the Board of Directors held this 9th of March, 1988, on motion of Director Hoffman seconded by Director Blankenship, and on the following roll call vote, to-wit:

AYES: Beal, Hoffman, Blankenship, Boniface, Price

NOES: None ABSENT: None

President of the San Simeon Acres Community Services District and of the Board of Directors Thereof

MEMORANDUM

DATE:

October 9, 2002

TO:

Board of Directors

VIA:

Mark Bloodgood, General Manager

FROM:

John Wallace, District Engineer

SUBJECT:

Proposition 50 Water Bond Initiative

RECOMMENDATIONS:

It is recommended that the Board adopt the attached Board Resolution supporting Proposition 50.

DISCUSSION:

On November 5, 2002, the electorate of California will be asked to vote on Proposition 50, a \$3.44 billion bond initiative. If passed, this initiative will be funded through the sale of general obligation bonds. The proposition will fund a variety of water projects including coastal protection, the CALFED Bay-Delta Program, integrated regional water management, safe drinking water, and water quality projects. Prop 50 was formed by coalitions of Northern and Coastal Counties to pursue funding for water related projects.

A series of regional meetings have been sponsored by this coalition including an organizational meeting for SLO County Communities on September 25, 2002. If Prop 50 is passed, supporters estimate that SLO County participants will share approximately \$15 million to fund local projects. The projects must be feasible, have strong local support and be completed in two years. The SLO County Coalition will be meeting again on October 16, 2002, to have local agencies submit their funding requests of no more than \$300,000. The agencies will then prioritize the funding requests. This list of projects will be sent to the initiative organizers.

A San Simeon Community Services District Resolution endorsing this proposition will help the District establish that there is public support for this initiative and will hopefully justify our District receiving funding for our water projects.

RESOLUTION NO. 02-282

A RESOLUTION OF THE BOARD OF DIRECTORS
OF THE SAN SIMEON COMMUNITY SERVICES DISTRICT
SUPPORTING LEGISLATION AND THE ACTIVITIES OF A COOPERATIVE
COALTION TO ALLOCATE FUNDING FROM FUTURE WATER BOND
INITIATIVES FOR PROJECTS THAT WILL BENEFIT
THE COMMUNITY OF SAN SIMEON, SAN LUIS OBISPO COUNTY AND OTHER
COUNTIES IN NORTHERN AND COASTAL CALIFORNIA

WHEREAS, the California electorate has approved three statewide bond initiatives over the past two years that provided \$6.67 billion for water and parks related programs in California, and an additional bond initiative, Proposition 50, is on the ballet for the November 5, 2002 election that would provide an additional \$3.44 billion if approved by the voters; and

WHERAS, development of a regional coalition to organize and promote local water projects for funding has proven to be effective in obtaining federal appropriations for California and enabling the completion of many beneficial projects; and

WHEREAS, The San Simeon Community Services District has established a list of capital equipment and projects which identifies our water and wastewater needs necessary for the health and safety of our community; and,

WHEREAS, the San Simeon Community Services District has identified the following projects to be consistent with its policy, provide important environmental benefits and warrant state funding as may be provided by future bond initiates:

- Reservoir Line Replacement
- Numerous Maintenance Upgrades System Wide including Water Tank Replacement
- Completion of Water Master Plan Studies including Water Recycling Project

NOW, THEREFORE BE IT RESOLVED that the Board of Directors of the San Simeon Community Services District approves the following actions:

- 1. Supports legislation to allocate funding from future Water Bond Initiatives for local projects in the Community of San Simeon.
- 2. Supports legislation to allocate funding from future Water Bond Initiatives for local projects in San Luis Obispo, Santa Barbara, Sonoma and other Northern and Coastal California Counties.

3. Authorizes the District Manager, or his designee, to work with other public agencies to help develop the Northern and Coastal California Water Bond Initiative Coalition to advocate and secure grant funds for drinking water, wastewater, fisheries, wetlands, water reuse, non-point source and flood control projects that will benefit San Luis Obispo, Santa Barbara, Sonoma County and other counties in Northern and Coastal California.

PASSED, APPROVED AND ADOPTED this 9th day of October 2002 by the following vote:

AYES:		
NOES:		
ABSTAIN: ABSENT:		
	President of the Board	•

FROM:

John L. Wallace, District Engineer

SUBJECT:

Safety Grating Purchase - Wastewater Treatment Plant

RECOMMENDATIONS:

Staff recommends the Board:

Authorize staff to purchase the new fiberglass reinforced plastic safety grating materials from Harrington Industrial Plastics of Ventura California in the amount of \$3,479.36, which includes tax and shipping costs.

FUNDING:

Currently, funds in the amount of \$5,000 are to be included in the District's Proposed FY 2002-2003 Budget for Safety Improvements - Grating.

DISCUSSION:

The existing steel grating system originally used at the wastewater treatment plant is severely corroded and in some cases missing entirely.

Reinforced fiberglass safety grating has been recommended as the material to select to replace the steel wire mesh. The new grating materials allows staff to cut and install each custom shape found throughout the plant. In addition, the new grating is skid and corrosion resistant.

Staff has solicited quotations from two suppliers of fiberglass reinforced grating materials. The lowest quotation received is Harrington Industrial Plastics in the amount of \$3,479.36.

John L. Wallace, District Engineer

SUBJECT:

Final Payment - Ocean Outfall Repair

RECOMMENDATIONS:

Staff recommends the Board:

Approve final payment to Underwater Resources, Inc., in the total amount of \$13,958.05

FUNDING:

Currently, funds in the amount of \$30,000.00 were carried over and are now included in the District's FY 2002-2003 Budget under Item No. S-9 Sewer System Improvements.

The estimated labor cost for the repair of the ocean outfall emergency repair was estimated at \$10,000.00, depending upon weather and surf conditions. The cost to purchase four new diffuser valves was \$4,412.00.

With the additional time required for construction during heavy surf, the total cost for the ocean outfall repair including the new diffusers is \$18,370.05.

DISCUSSION:

Staff has coordinated installation of the four new diffusers and underwater repairs with Underwater Resources, Inc., of San Francisco, California. The goal was to complete the repairs as soon as practicable considering surf/weather conditions. Unfortunately, the contractor experienced heavy surf during the repairs of the outfall and the project took longer than expected. The extra cost associated with the heavy surf conditions and extra time is \$3,958.05.

It is recommended by staff to approve Underwater Resources, Inc., final payment of \$13,958.05.

Well levels rise following efforts to save water

Kathe Tanner The Tribune

SAN SIMEON - Since the San Simeon Community Services District put stringent water-conservation measures in place, levels in the district's water wells have risen just a bit, according to Plant Superintendent Ron Head.

"Because the board passed the ordinance, some of the people here are trying hard," he said.

The district has banned the use of its potable water for:

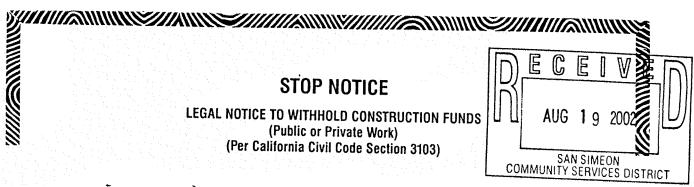

- washing cars and other kinds of vehicles and mobile equipment;
- washing sidewalks, driveways, buildings, parking lots or other structures (except in cases of fire or threat to public sanitation);
- · irrigating plants and other landscaping; and
- refilling, filling or adding water to pools, fountains and spas (other than that amount needed to keep the equipment operative and replace water that has evaporated).

The Aug. 14 ordinance states that water supplies are limited, the district's water has problems with undesirable levels of chlorides, there is no long-term solution to the water shortage and there is a risk of running out of water by the end of the dry season.

Also, restaurants may not automatically serve glasses of water to customers but can provide water if patrons request it.

The district has put similar ordinances in place before during unusually dry months and during droughts.

Dear Ms. Putnam:

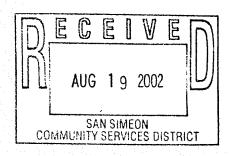

Thank you once again for having contacted me regarding your concerns with the impact of energy surcharges on local government. I have again contacted the Public Utilities Commission to remind them of my interest on your behalf.

Please be assured that I will continue to monitor this matter and keep you advised of any information I receive.

Sincerely,

ABEL MALDONADO Assembly Member

The Administrative Law Judge Decision listed below states that your reserve account is relieved of benefit charges for the following claimants. We have removed the benefit charges and adjusted your reserve account.

<u>NAME</u>	<u>SSA</u> <u>NUMBER</u>	DATE OF CLAIM	<u>CHARGES</u>	DECISION NUMBER	DATE OF DECISION
F WARREI	V 573-72-5820	09-24-00	\$5980.00	600311	04-18-02

Enclosed is an amended Notice of Contribution Rates and Statement of UI Reserve Account, DE 2088. If your rate has been lowered and you have already paid UI contributions at the previous tax rate, you may take credit against future UI payments due within this tax year. If you do not take the credit for the excess contributions during the year, it will be refunded to you after the Annual Reconciliation Return (DE 7) is processed.

If the removal of the above charges makes you eligible to participate in the Voluntary UI Program, or changes your payment option amounts, enclosed will be your new Voluntary UI Contribution Notice, (DE 2088A), and the Explanation and Worksheet, (DE 2088VU). If you previously submitted a payment that was sufficient for one of the options, it is reflected on the enclosed notice. If you would like to reduce your UI rate to one of the other options, please use the enclosed Voluntary UI Contribution Form to remit any additional amounts due.

If you have any questions, please contact Judy Huang of my staff at (916) 654-6494.

REPEAL OF REGULATIONS AFFECTING THE

C

AUG

1 5 2002

SAN SIMEON COMMUNITY SERVICES DISTRICT

FUNCTIONS AND SERVICES OF SPECIAL

DISTRICTS WITHIN THE COUNTY

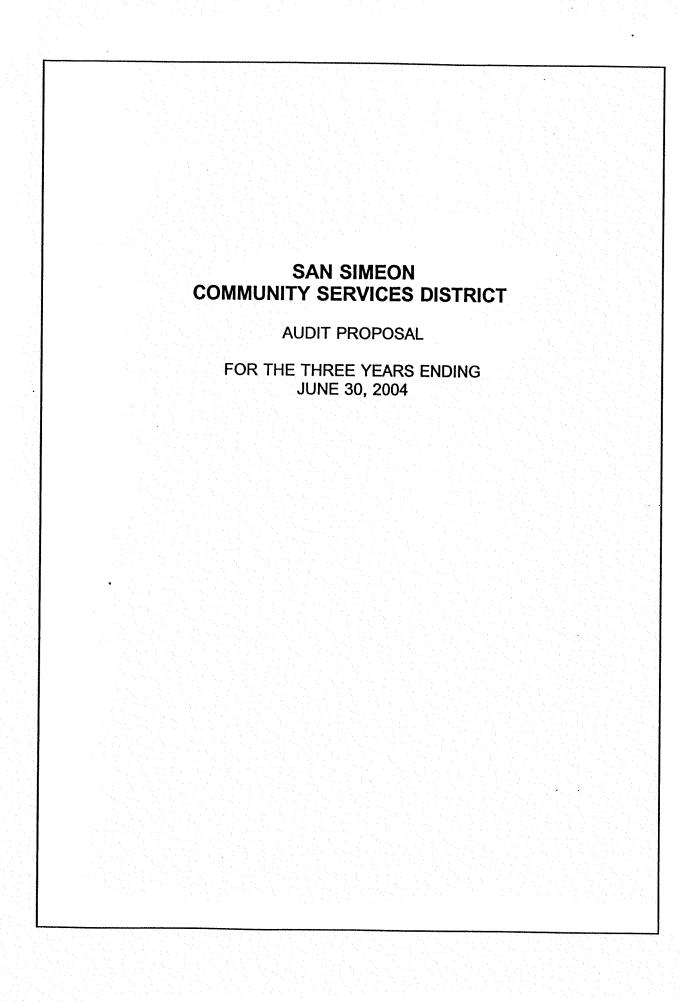

At its July 17, 2002 meeting, the Commission considered a request from the SLO Chapter of the California Special Districts Association to repeal its rules and regulation concerning the exercise of latent powers by special districts. Latent powers are those powers that were authorized when the district was formed, but are not actively used presently. Since 1994, if a district wishes to exercise a latent power, it must first receive LAFCO approval. This requirement was a condition of special district representation on the Commission, but has since been repealed as part of the Cortese-Knox-Hertzberg Act of 2000.

Repeal of the rules and regulations affecting latent powers can either be initiated by the Commission or by a majority of the independent special districts within the County. Since having each special district adopt a resolution asking LAFCO to repeal its rules and regulations would be a cumbersome process, the Special Districts Association requested that the Commission initiate the process.

The Commission has agreed to initiate the repeal process, but has requested that the independent special districts be given an opportunity to comment on this action. The Commission will consider repealing these rules and regulations at its September 19, 2002 meeting. Therefore, if any special district has concerns about this action they should contract me before the September hearing date. Scheduling the hearing for September should allow special districts adequate time to place this matter on their board agendas, if necessary.

Please feel free to contact me if you have any questions or need further information.

July 18, 2002

Board of Directors
San Simeon Community Services District
111 Pico Avenue
San Simeon, California 93452

Members of the Board:

We appreciate this opportunity to submit our proposal for the audits of the San Simeon Community Services District, for the years ended June 30, 2002, June 30, 2003, and June 30, 2004.

QUALIFICATIONS OF THE FIRM

Crosby & Cindrich is a full-service CPA firm, located in San Luis Obispo. Both Partners, collectively, have thirty-one years of auditing experience. Our experience with governmental fund accounting and auditing and our familiarity with the San Simeon Community Services District accounts will enable us to audit and prepare the required reports in the most efficient and timely manner. We will make ourselves available when you need us, giving prompt, informed responses to your questions, while conducting your audit in a professional, comprehensive manner.

Crosby & Cindrich meets all current GASB audit standards. The Firm successfully conducted an independent peer review of its accounting and auditing practice in June 2000. The review indicates that the Firm maintains the strict quality control standards set by the American Institute of Certified Public Accountants (AICPA).

Our professional liability insurance is with CAMICO; with coverage totaling \$1,000,000.

The following discussion outlines the technical, timing, and fee details of our proposal.

AUDIT APPROACH

We will audit the financial statements of the San Simeon Community Services District for the years ended June 30, 2002, June 30, 2003, and June 30, 2004, for the purpose of expressing an opinion on them. The financial statements are the responsibility of the District's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We will conduct our audits of the San Simeon Community Services District on the accrual/ modified accrual basis, in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit will provide a reasonable basis for our opinion.

Based on discussions with management and our review of your operations and accounting systems, we will obtain a firm understanding of your system of internal control, and test the effectiveness of the internal controls in place. This will enable us to determine the timing and extent of our substantive audit testing. We will not issue an opinion on the system of internal control. We will however, issue a management letter at the conclusion of the engagement, informing you of any material weaknesses or reportable conditions we find in the internal control system. We will also include, in the management letter, any business advisory comments or observations we feel may improve the efficiency and effectiveness of operations of the San Simeon Community Services District.

Our audit procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, and tests of the physical existence of Property, Plant, and Equipment, as well as, direct confirmation of receivables and certain other assets and liabilities with certain creditors, legal counsel, and banks. We will search for unrecorded liabilities and perform analytical procedures on the income and expense accounts. In addition, we will compare actual performance to budgeted levels and investigate material discrepancies.

We will prepare the independent auditors' report on the audit of the financial statements of the San Simeon Community Services District, financial statements, the appropriate footnotes to the financial statements, in accordance with generally accepted accounting principles. We will also prepare the "Annual Report of Financial Transactions of Special Districts" for the State Controller Division of Local Government Fiscal Affairs, and review the annual calculation of the appropriations limitation for the years ended June 30, 2002, June 30, 2003, and June 30, 2004.

ENGAGEMENT TIMING

We expect to commence the audit work as soon as most of the items on our "items needed list" are completed by your staff. We would like to have all audit confirmations mailed by July, to avoid any confusion in the responses. We will provide a list of the schedules and supporting information required for the audits. Provided that we do not encounter unforseen obstacles, and the necessary schedules are timely prepared by your staff, the draft copy of the annual report, management letter, and appropriations limitation report will be completed by September 30 and the final report copies will be submitted by October 31 of each year.

METHOD AND BASIS OF COMPENSATION

The San Simeon Community Services District audit should require approximately 50 hours to complete. The total current year audit fees are not expected to exceed \$3,200. The two subsequent years included in the bid proposal will each be \$3,200, with a possible adjustment for inflation based on the consumer price index.

If extraordinary circumstances or major personnel changes indicate more intensive and detailed services are required, we will consult with you before increasing our maximum fee. Additional fees will be based on our standard hourly billing rates.

Additional fees may be required if the San Simeon Community Services District requires assistance in implementing the new GASB 34 requirements. Based on the District's annual revenue, it appears as though the District will be required to implement these changes in the 2003/2004 fiscal year.

Our audit staff includes two CPAs and one Enrolled Agent staff accountant. Our firm does not utilize CPA trainees to conduct the audit and field work. Our clients expect to learn from our expertise, rather than train our staff accountants. We will insure that the books are adequately closed and the proper reversing entries are made for the subsequent year. If needed, we will spend extra time to help educate the San Simeon Community Services District's staff on the proper audit procedures and preparation for the audit.

We provide these extra services to maintain a long-term working relationship with all of our audit clients. We believe that the benefits of these extra services streamline future audits and ultimately are passed on to the organization in reduced audit rates.

We are enthusiastic about working with you and welcome your inquiries.

Respectfully submitted.

Re: Water Restriction Ordinance No. 96 – 1st Offense Warning Notice

Dear Sir or Madam:

This Notice serves as an Official Warning Notice that you violated the terms of the San Simeon Community Services District Ordinance No. 96 – Water Emergency – Mandatory Restrictions, adopted August 14, 2002.

The District wells are perilously low due to lack of adequate rainfall this year. Residents and businesses in San Simeon were notified of the need to restrict the use of water. A separate letter was also sent to all businesses, outlining the need to comply and the consequences for any violations of the Ordinance.

Please be advised that any subsequent violation(s) shall be considered a misdemeanor, punishable by fine and or discontinuation of water service.

If you have any questions, please contact the District Office at 927-4778.

Sincerely,

Mark A. Bloodgood General Manager

San Simeon Community Services District - Wastewater Facilities Plan

Draft Report K/J 025004.00

Gentlemen:

As discussed with you through our telephone conversation earlier today, I find that tomorrow I must go to the hospital for some needed surgery. The "rough" estimate is that I will be in the hospital for five days, followed by a couple of weeks of recovery. This unexpected circumstance will intrude on my ability to make a formal presentation to the District Board of our Facilities Plan report in the near future.

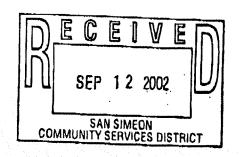

As you know, I have provided you with draft copies of each of the report chapters and have received comments from you as well as comments from the Community Affairs Committee. As a result of these communications, I have made several changes in the original report drafts.

It is still my intent that you, other District Staff and assigned Committee have a final opportunity for input to the Facilities Plan report prior to finalizing for Board review and approval. It is my experience that the best engineering reports and reports that are most helpful are those which have had the most thorough review.

Because of the uncertainty of my schedule, in the meantime I though it would be helpful for you to have a complete copy of the revised report draft to date for your consideration. I leave it to you to decide as to the extent of distribution of this revised report draft for still further review at this time and in anticipation of my return and scheduling of a visit to San Simeon to meet with the District Board, or assigned Committee.

Thank you for your continued assistance in this matter.

- 3. **Budget Preparation for 2002-2003** To be discussed under Discussion/Action Item number 7.3.
- 4. Facilities Plan/Wastewater Treatment Plant Ongoing to be reported in District Engineer's report.
- 5. Completion of the Action Plan We cancelled the October 7, 2002 date when two board members were unable to make the meeting. 100% participation should be the rule for this session. The Plan is very important for the future of the District.
- 6. Discussions with Roger Lyon, Council for the Hearst Corp. Paul Reichardt and Mark Bloodgood meet with Roger Lyon in September to talk about the District being able to again use the Hearst Ranch well as an emergency backup, dealing with the fencing requirements around our regular wells, and other topics related to the District. Mr. Lyon will be talking with Marty Cepkauskas and others at the Hearst Corporation and will report back with us.
- 7. **Financial Statements** The audit of the District's financial statements is currently underway by the firm of Crosby and Cindrich. This is the third year of their three-year contract. The Quarterly Investment Report for the period ending 6/30/02 will be presented under Items of Business (Item 6.3)
- 8. Research into Insurance Deductible Question Director Kiech and a few community members had questioned Management's decision not to submit a claim to our insurance carrier for the auto accident involving the District truck and

Mark A. Bloodgood, General Manager Robert W. Schultz, District Counsel

Kim Allison, Office Administrator John L. Wallace, District Engineer Ms. Putnam's car. Specifically the question came up regarding Warrant No. 0207-034 for \$865.13 to San Luis Autobody. Director Kiech had asked the District's Auditor be contacted to verify that not submitting the claim was acceptable. Staff did this and also contacted the District's insurance agent and

0207-034 for \$865.13 to San Luis Autobody. Director Kiech had asked the District's Auditor be contacted to verify that not submitting the claim was acceptable. Staff did this and also contacted the District's insurance agent and two other independent insurance agents. All agreed that not submitting the claim was the correct action.

9. Use of the District Truck - Director Kiech had voiced concern to the District Manager regarding the District Truck being seen in Cambria on three separate occasions at various times. Mr. Kiech and others in the community have raised this concern on numerous other occasions. Management had previously requested the plant operators to make sure that they logged their mileage. They have done this since May of 2001. There have also been strong feelings voiced about the District truck being taken home overnight to the Superintendent's house when he is on call for the District, since the Superintendent has moved his residence from Cambria to a more remote location.

Staff researched this matter. Regarding the three incidents first mentioned, per the log being kept by District personnel, the truck was in Cambria at the specific times listed by Mr. Kiech, when the plant operator, Michael Hassett, had taken the truck during business hours to go to lunch. In addition, Management discovered that the truck was not being driven to Mr. Head's residence but was, in fact, being parked at his mother's house in Cambria. According to Mr. Hood, this was being done in order to limit the number of miles being driven on the truck and to get the vehicle away from the effects of the ocean air at the plant.

Further research has indicated that for the current calendar year, the truck is being driven an average of 47 miles per day. In addition, it was discovered that plant personnel use their own vehicles 11% of the time, instead of the District truck, on District business. In reviewing the policy currently in affect with the District none of this appeared to be out of line. Management suggests that the Policy Committee make this a high priority to review the policy, solicit Board input, and make any changes desired.

Staff has been directed to policitation for bids on this project and to proceed with the higher

4. Annual Road Impostaff continues final street accordance with the soils engineer recommendations that identifies both reconstructional design criteria for this project

..60

5. Capital Improvement Projects Priority List;

(See Proposed Fiscal Year 2002 - 2003 Budget)

6. Pico Creek Wells;

No further updates at this time, improvements are to be included in the Proposed FY 2002-03 Budget.

7. Emergency Standby Power;

The final recommendations for the type and capacity of standby power will be made by Kennedy/Jenks Consultants as part of the facilities plan recommendations.

8. Wastewater Treatment Plant Rip Rap—Coastal Commission Notice of Violation
Staff has prepared a Coastal Development Permit Application (CDP) and is submitting it to the
County. An exhibit of a field survey which showed the boundary between County and State
jurisdiction was previously prepared and submitted to both the County and the State. The project lies
in County jurisdiction.

9. State Revolving Fund (SRF) Program;

Staff investigated potential loan funding for wastewater projects through the State Revolving Fund which provides loans at a low interest rate (approximately 2.5 to 3%). Because of the potential to construct several different improvements with SRF funds, a "general project" application was submitted as a "place holder" for the SWRCB to consider. San Simeon has been placed on the draft State-wide priority list for funding. A project application will be submitted in accordance with Facilities Plan recommendations and the Proposed FY 2002-03 Budget.

10. Facilities Plan:

The facilities plan is being completed. A preliminary draft report was provided in July for review. The Facilities Committee reviewed the draft several times and comments from the Chamber of Commerce have also been sent to KJC. The final draft report is anticipated to be provided for review in September. The Facilities Plan will address the following projects previously considered by the Board:

1. Equalization Basin Conversion;

Kennedy Jenks is reviewing alternatives to modify and improve the operation of this EQ basin, and recommendations will be incorporated into the overall facilities plan.

2. Recycling Water Supply;

The study was completed in August 2001, and grant reimbursement of 50% of the cost of the study has been received. Further refinement of an acceptable project and a determination of property owners willing to take the water should be done following the development of the Facilities Plan. The anticipated first phase of the water recycling project is included in the FY 2002-03 budget.

3. Safety Projects;

The grating replacement project is scheduled for Board consideration on September 11th. Additional projects are to be identified as part of the Facilities Plan.

4. Shop / Storage Building;

Recommendations for the building will be addressed as part of the Facilities Plan. No further update at this time.

SAN SIMEON COMMUNITY SERVICES DISTRICT

111 Pico Avenue San Simeon, California 93452 (805) 927-4778

DATE:

October 9, 2002

TO:

Board of Directors

VIA:

Mark Bloodgood, District Manager

FROM:

John L. Wallace, District Engineer

SUBJECT:

Engineer's Report - Project Status

SUMMARY OF ACTIVE PROJECTS:

- 1. Temporary Odor Control Status
- 2. Air Piping Replacement Completed
- 3. Avonne-Castillo Loop On Hold
- 4. Annual Road Improvements Contract package being prepared.
- 5. Capital Improvement Project List/Descriptions and Estimated Costs FY 02/03 Ongoing.
- 6. Pico Creek Wells Flood proofing Included in Proposed FY 2002-03 Budget.
- 7. Standby Power Included in Facilities Plan
- 8. Wastewater Treatment Plant Riprap & Aeration Tank Expansion-Coastal Permit
- 9. State Revolving Fund Loan Application made.
- 10. Facilities Plan: Next draft available in October, 2002

DISCUSSION:

1. Odor Control;

The odor control chemical feed system continues to be used as originally installed, with chemical feed at the Hearst lift station. Kennedy/Jenks Consultants has reviewed the odor control project and has included recommendations in the draft facilities plan in light of the future plans for the equalization basin. There have not been odor complaints at the treatment plant as of recent.

2. Air Line Replacement Project;

Completed--the statutory 30 day lien period expired August 25, 2002. Superintendent Head is in the process of replacing two 30 HP blower motors.

3. Avonne - Castillo Waterline Loop;

The Board has decided to postpone solicitation for bids on this project and to proceed with the higher priority water line project (line to storage tank).

4. Annual Road Improvements (Avonne Avenue and Otter Way);

Staff continues final street design in accordance with the soils engineer recommendations that identifies both reconstruction and overlay design criteria for this project.

5. Capital Improvement Projects Priority List;

(See Proposed Fiscal Year 2002 - 2003 Budget)

6. Pico Creek Wells:

No further updates at this time, improvements are to be included in the Proposed FY 2002-03 Budget.

7. Emergency Standby Power;

The final recommendations for the type and capacity of standby power will be made by Kennedy/Jenks Consultants as part of the facilities plan recommendations.

8. Wastewater Treatment Plant Riprap & Aeration Tank Expansion-Coastal Permit

Staff has prepared a Coastal Development Permit Application (CDP) and submitted it to the County on September 24, 2002. A field survey showing the boundary between County and State jurisdiction was previously prepared and submitted to both the County and the California Coastal Commission. The California Coastal Commission are still reviewing this document. Through the processing of the rock rip rap project, the 1985 Coastal Permit has resurfaced. Staff is preparing a response to the California Coastal Commission requesting information regarding the completion of the conditions to the 1985 permit.

9. State Revolving Fund (SRF) Program;

Staff investigated potential loan funding for wastewater projects through the State Revolving Fund which provides loans at a low interest rate (approximately 2.5 to 3%). Because of the potential to construct several different improvements with SRF funds, a "general project" application was submitted as a "place holder" for the SWRCB to consider. San Simeon has been placed on the draft State-wide priority list for funding. A project application will be submitted in accordance with the final Facilities Plan recommendations and the Proposed FY 2002-03 Budget.

10. Facilities Plan:

The final draft Facilities Plan has been completed by Kennedy Jenks, and is under review by the Facilities Committee. Kennedy Jenks incorporated preliminary draft comments provided by the Facilities Committee and staff. It is anticipated that Mr. Jenks will make a full presentation to the Board at it's November meeting.

A. Equalization Basin Conversion;

Recommendations have been incorporated into the draft Facilities Plan.

B. Recycling Water Supply;

Refinement of an acceptable project and a determination of property owners willing to take the water should be done following the development of the Facilities Plan. The anticipated first phase of the water recycling project is included in the FY 2002-03 budget.

C. Safety Projects;

The grating replacement project is scheduled for Board consideration on October 9th. Additional projects are to be identified as part of the Facilities Plan.

D. Shop / Storage Building;

Recommendations for the storage building will be addressed as part of the Facilities Plan. No further update at this time.

Date: Wednesday, August 14, 2002 Place: Cavalier Banquet Room

MINUTES

1.0 CALL TO ORDER

The Board convened at 5:30 p.m.

1.1 Roll Call:

Directors Present: Carol Bailey-Wood, Loraine Mirabal-Boubion, David Kiech, Bob McLaughlin and Eric Schell

Staff Present: District Manager Mark Bloodgood, Assistant District Manager Eileen Putnam, District Counsel Robert Schultz

1.2 Public Comment on Closed Session:

There were no comments.

2.0 ADJOURN TO CLOSED SESSION

A motion was made by Director Bailey-Wood and seconded by Director Mirabel-Boubion to adjourn to closed session for Personnel/General Manager Discussion – Government Code 54957 – Discussion regarding the General Manager Contract and Conference with the General Manager, the District's Designated Representative, for the purpose of reviewing the District's position regarding the terms and compensation paid to the unrepresented employees and giving instruction to the Designated Representative. Motion carried unanimously.

3.0 RECONVENE IN OPEN SESSION/CALL TO ORDER

The Board re-convened in open session at 6:30 p.m.

3.1 Roll Call:

Directors Present: Directors Carol Bailey-Wood, Loraine Mirabal-Boubion, David Kiech, Bob McLaughlin and Eric Schell.

Staff Present: District Manager Mark Bloodgood, Assistant District Manager Eileen Putnam, District Engineer John Wallace and District Counsel Robert Schultz.

- 3.2 Pledge of Allegiance Led by Chairperson Bailey-Wood
- 3.3 Report on Closed Session:

District Counsel Schultz reported that the Board met in closed session for the purpose of discussing the General Manager's Contract and for conferencing with the General Manager, who serves as the Designated District Representative, to review the District's position regarding the terms and compensation paid to the un-represented employees and giving instructions to the Designated Representative. No action was taken.

4.0 PUBLIC COMMENT

4.1 <u>Public Comment:</u>

The subject of obstruction of the fire hydrant, parking issues and littering on Balboa Avenue was presented. Staff had been made aware of the situation and took steps to address residents concerns, including painting the curb to indicate no parking, speaking with surfers regarding the need to pick up

SSCSD Regular Board Meeting August 14, 2002 Page 2 of 5

their trash, and contacting the Sheriff's Department to request additional patrols in the area. Another matter presented by the public related to complaints about the noise, speeding, loitering, and debris in and around the Courtesy Inn – rear area. Lt. Basti addressed the matter by stating that residents should direct their concerns to Supervisor Shirley Bianchi. Additionally, residents noting any disturbances and or violations should contact the Sheriff's Department immediately. However, Administration of Code Enforcement is not within the jurisdiction of the Sheriff's Department. A concerned resident presented photos of graffiti, which had been exposed when management of the Inn cleared green waste and debris, the representatives of the Sheriff's Department. Director Schell also raised the point that the evening dispatch at the Sheriff's Department is a problem. Discussion followed.

4.2 Sheriff's Report:

Deputy Todd Steeb gave the Sheriff's Report. With regards to the matter of evening dispatch, should residents encounter problems, they should call Lt. Basti and he will contact Deputy Steeb. The Deputy also stated that he and his partner plan to be proactive, and to make their presence known in the area. He indicated that he has already made contact with management at the Courtesy Inn and will attempt to facilitate a satisfactory resolution. Deputy Steeb also reiterated that he is working with staff regarding the concerns of Balboa Avenue residents. Finally, he reiterated that he will do everything possible to assist with the noise, loitering and speeding problems in the Avonne Avenue area.

5.0 STAFF REPORTS

5.1 General Manager's Report

Mr. Bloodgood reported that staff is looking into available water conservation education material for broadcast within the District. The August 5th Strategic Planning Session was postponed and that slot was utilized for a Budget Workshop. Robert Rauch is available to facilitate a planning session in October, preferably October 7th. Representatives of Hearst Corporation had to re-schedule our meeting of August 15th. The purpose of this meeting will be to work out details for using the Hearst Ranch well as an emergency backup, addressing the fencing requirements around the District's existing wells and other topics related to the District. Management did have a meeting with Kirk Sturm - Director -Superintendent of Hearst Castle, and discussed several issues, including participation in the infrastructure upgrade, billing adjustments, recycled water and other mutual concerns. Mr. Sturm is also helping our efforts to establish a means for gaining access to an emergency backup generator via the County Office of Emergency Services. A packet of information outlining these items has been forwarded to State Parks staff for review and feedback. The information has also been sent to elected representatives. The District secured its domain name and the web site will be moved to its new location and will be available for viewing on Monday. The address is http://www.sscsd.org. Staff obtained quotes for new water conservation signs and passed the information on to the Chamber of Commerce for review. The hope is that they will contribute to the cost of the new signs. The District will continue its efforts to work jointly with the Chamber. Staff and Board Members expressed disappointment that they did not receive any information about the Chamber's Cleanup Day. Chamber President Lambeth apologized, and stated he would provide a lead time of 30 day's notice next time. In regards to weed abatement, the program is complete and that payment had been received from the estate of one property owner whose lot the District had cleared. Finally, Mr. Bloodgood stated that financial statements would be made available to the Board members on a regular basis. The Investment Report for the period ending 6/30/02 will appear on the September agenda.

5.2 Plant Superintendent's Report

Mr. Wallace gave the Superintendent's Report, indicating that usage and flows reflected a slight decrease. The well depths are being closely monitored and today, the level was 12.61. The chloride levels are at acceptable levels. The compound meters have been received and, while the Courtesy Inn shut off their water on July 23rd for repairs, staff replaced their old water meter with the new compound meter. The EQ tank was bypassed for cleaning. Al's Septic pumped the grit out of the bottom of the chamber. On the

evening of July 29th, staff responded to a call regarding a water leak at 555 Pico Avenue. The contractor clearing the weeds ran over the water line on the customer's side of the meter. Staff responded and assisted with making the necessary repairs. The new Dissolved Oxygen probes are installed and operating with the VFD to control the blower speed, thereby holding a constant DO level in the treatment plant. Staff also installed a High Efficiency (93%) 60hp motor on blower #4. Director Kiech asked why the 60hp motor had been replaced. Staff indicated that the Board had received been notified in a past staff report that the old motor could not be connected to the new VFD's during the airline project, and that it needed to be replaced. Director Kiech stated he thought staff was going to wait for the Facilities Plan before replacing any equipment at the plant. He stated that his desire had been to replace the 60hp with a smaller motor since the plant didn't need that much power to run. Michael Hanchett made reference to a statement in the initial Draft of the Kennedy Jenks report that said the plant can operate on 37hp and said that staff should not replace anything else until the Facilities Plan is completed. Mr. Bloodgood stated he would research this. Quotes for the new fiberglass grating around the EQ are still being solicited. Finally, staff has begun painting the fire hydrants in the community. The curbs near the hydrants will also be red striped to indicate No Parking Areas. In response to questions regarding the difference between Gross Water Production and Net Water Production, Mr. Wallace indicated that the discrepancy might be due to the number of days included in the meter readings. The well meters may be read on a different day than the water meters. Staff will look into this.

5.3 <u>District Engineer's Report</u>

District Engineer Wallace stated that the odor control chemical feed is now being used concurrent with the use of the equalization basin. Kennedy Jenks will be including recommendations in light of future plans for the EQ basin. The final corrections have been made and the DO sensors have been replaced and are linked to the operations of the blowers. The Contractor has completed the work and a Notice of Completion has been filed with the County Recorder's office. The statutory lien period expires 8/25/02. Mr. Wallace indicated that a revised schedule for construction of the Avonne Castillo Waterline loop was being coordinated with Accor/Motel 6. A brief discussion was held regarding the need for this project and the benefit of increased fire flow that will result from completion of the looping projects. The question of whether the easement had an expiration date was also raised. Staff will look into this. Discussion continued with the consensus being that all work on this project should be suspended until the final determination of what projects were to be considered priority for FY 2002-03 is complete. Mr. Wallace reported that coordination with the Soils Engineer continues with regards to the road repair project for Avonne Avenue and Otter Way. As reported before, final recommendations relating to the emergency generator for the plant will be made by Kennedy-Jenks in their report. In regards to the Coastal Commission-WWTP Riprap issue, Mr. Wallace explained the history of the situation, and that staff had been working on the issue of which agency the District needed to file a permit with. With the determination of the Mean High Tide now completed, it is clear that the survey shows the riprap is well above the Mean High Tide. As a result, staff will schedule a meeting with Coastal and County staff to review the information and will also commence with the application process with the County. Staff is also researching potential loans funding for wastewater treatment projects via the State Revolving Fund Program. Finally, Mr. Wallace reported that staff is continuing to work with Kennedy-Jenks and the Facilities Advisory Committee on reviewing the initial drafted chapters of the Facilities Plan. Chapter 5 should be forthcoming.

6.0 ITEMS OF BUSINESS

6.1 Approval of Minutes – July 10, 2002:

A motion was made by Director Mirabel-Boubion and seconded by Director McLaughlin to approve the minutes of July 10, 2002. The motion carried unanimously.

6.2 Approval of Warrants – July 1, 2002 through July 31, 2002

A question regarding Warrant No. 0207-009 for Weed Abatement (\$550) and why it was higher than last year was raised. Staff indicated that this encompassed all of the District's usual clearing in addition to the

overgrowth on Pico Avenue that had been discussed at prior meetings. Since this was a right of way issue and the District's responsibility, Mr. Rice cleared the overgrown bushes that were obstructing the roadway. The cost also included the clearing of the Goshgarian lot. This cost, with the specified 10% markup, was billed to the trustees of the property and their payment has been received. Director Kiech asked about Warrant No. 0207-034 (\$865.13)to San Luis Autobody for bumper repair, and whether this should this have been submitted to the District's Insurance Carrier for processing. Director Kiech was reminded that he and other members of the Budget Committee were present & meeting at the District Office when the accident occurred, specifically the district truck was accidently backed into Ms. Putnam's car. Staff explained that the District has a \$500 deductible and that submitting the claim would adversely affect the District's premiums and rating. Director Kiech requested that the District's Auditor be contacted to verify that not submitting the claim was acceptable. A motion was made by Director Mirabel-Boubion and seconded by Director McLaughlin to approve the Warrants for July 1 through July 31, 2002. Motion carried unanimously.

7 DISCUSSION/ACTION ITEMS

7.1 Ordinance No. 96 - Relating To Mandatory Water Conservation Restrictions

District Counsel Schultz recapped the discussion at the July meeting, where the Board had requested more stringent penalties for violations to the Water Restrictions. Mr. Schultz had reviewed other agencies policies. As a result, fines were included in the Ordinance. A discussion followed, and it was pointed out that Counsel had inadvertently omitted two restrictions: 1) that all outdoor irrigation of vegetation with SSCSD water shall be prohibited and 2) the washing of automobiles, trucks, trailers, boats, mobile homes and other types of mobile equipment with SSCSD water is prohibited. The penalties were also discussed, and the consensus was that they should be listed as follows: 1st Offense is an infraction and a Warning will be issued; 2nd Offense is a misdemeanor with a \$100 fine; 3rd Offense is a misdemeanor with a \$250 fine; and the 4th offense shall result in discontinuance of water service. Cooperation will be the key to success. A motion was made by Director Kiech and seconded by Director Schell to adopt Ordinance No. 96 declaring a Water Emergency within the District, repealing Ordinance No. 95, and re-establishing a Comprehensive Water Conservation Plan, with the above amendments to be included in the Ordinance. A roll call vote was held with Director's Kiech, McLaughlin, Schell, Mirabel-Boubion and Bailey-Wood all voting in the affirmative. Motion carried unanimously. The information will be disseminated to the press, residents and businesses of San Simeon, and will be posted in various locations throughout the District. The information mailed to residents will be bi-lingual.

7.2 Preliminary Fiscal Year 2002 – 2003 Budget

Mr. Bloodgood reported that staff is still compiling information on cost saving strategies for the FY 2002-03 Budget. Mike Hanchett indicated that we is concerned the Board is not dealing with Capital Improvements correctly, and that they need to be dealt with in a different manner. He also stated that he felt Zero Based Budgeting was not used correctly. As for Employee Compensation and any Cost Of Living Adjustments that may be considered, he would like to know what Index is being utilized. He recommended a review of the staffing patterns at the wastewater plant, a switch to bi-monthly billing, and potentially closing the office and outsourcing the accounting/administration. Terry Lambeth suggested that the District should look at the cost of outsourcing the office duties and look at the implication of such action over time. Mr. Bloodgood replied that every one of these items, in addition to other potential cost savings strategies, had already been raised by the Budget Committee and/or members of the Board and were being reviewed as part of the budget process.

7.3 Board Committees

Water Committee: Met on August 7th and discussed two topics. In regards to water recycling, the committee would like to enter into discussions with the State Parks regarding the possibility of providing recycled water to the Visitor's Center. The committee would also like to develop a database with an

inventory of the current water. The recommendations of the committee are to 1) direct the General Manager/Paul Reichardt to write a letter of introduction to the State Parks Superintendent regarding the possibility of providing recycled water to the Visitor's Center and 2) to direct the Budget Committee to allocate \$5,000 in the FY 02-03 Budget for development of a Water Inventory. Director Bailey-Wood made a motion to accept the recommendations of the Water Committee. The motion was seconded by Director Kiech, and the motion passed unanimously. The Water Committee's next meeting is scheduled for September 4th.

Budget Committee: No Report

<u>Policy Committee</u>: A meeting will be scheduled. The CSDA Sample Policy Book has been purchased. District Counsel Schultz will be working with the Committee after September 1st, when he is officially on a monthly retainer.

<u>Facilities Committee</u>: The Facilities Committee has reviewed the initial draft of the first four chapters of the Kennedy Jenks Report and submitted their comments to Mr. Jenks. The Chamber Advisory committee also submitted their comments to Mr. Jenks for consideration. The Committee is awaiting initial drafts of the last two chapters, which will include Kennedy Jenks recommendations.

7.4 Board Reports

Director Bailey-Wood gave a brief report on the last North Coast Advisory Committee meeting.

- 7.5 Robert's Rules of Order and Orderly Conduct At Meetings
 Sample information of was provided to the Board of Directors for review. This matter was referred to the Policy Committee for review. The Policy Committee can then formulate a recommendation for the Board to consider.
- 8 BOARD/STAFF GENERAL DISCUSSIONS AND PROPOSED AGENDA ITEMS
- 9. ADJOURNMENT

The meeting was adjourned at 7:45 P.M.

SAN SIMEON COMMUNITY SERVICES DISTRICT WARRANT REPORT

DATE:

October 7, 2002

TO:

Board of Directors

VIA:

Mark Bloodgood, General Manager

FROM:

Paul E. Reichardt, Assistant General Managel

SUBJECT:

Request for Will Serve Letter

RECOMMENDATIONS:

Staff recommends the Board;

1. Review the attached request from David Brown regarding the Russel property.

2. Authorize staff to respond to Mr. Brown's request with the contingencies outlined below.

DISCUSSION:

The Board has received a request from David M. Brown, on behalf of his client, John Russel, regarding proposed renovations on the property located at 555 Pico Avenue in San Simeon. Mr. Russel wishes to remodel the house located at this address. Prior to issuing a permit, the County of San Luis Obispo requires a letter from the District affirming that this project meets with the District's approval and that it is in compliance with the current moratorium relative to water and sewer connections.

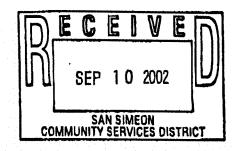

Upon initial receipt of Mr. Brown's request, staff contacted him to request copies of both the existing and proposed floor plans. Having reviewed these sketches, it is staff's opinion that the Board could direct staff to draft a letter outlining approval contingent upon;

- 1. Full compliance with the District's Ordinance No. 66 relative to the moratorium on the issuance of Water and Sewer connections within the District.
- 2. Submittal of three (3) full sets and one (1) reduced set of construction documents which will allow staff to review and determine whether the project is in full compliance with District Ordinance.

J:\Eileen\Eileen\San Simeon\Memos\David Brown Request 10-9-02.wpd

DAVID M. BROWN

August 28, 2002

Ms. Carol Baily-Wood Chair, Board of Directors San Simeon Community Services District 111 Pico Avenue San Simeon, Ca. 93452

Dear Chairwoman Baily-Wood:

I am contacting you on behalf of Mr. John Russel who recently purchased the property at 555 Pico Avenue in San Simeon Acres.

Upon his retirement as a teacher in Missouri, Mr. Russel intends to move here and live in this house as a full time resident. Consequently, he wants to make some modifications to the house that would require a permit from the San Luis Obispo County Planning and Building Department. These modifications include the remodel of both the interior and the exterior of the existing 785 square foot residence.

The interior work will include modification to the layout of the rooms within the building on a like for like basis. No new rooms or plumbing fixtures will be added, except that all of the replacement fixtures will be of the low flow, water saving variety.

The exterior work will include the addition of new doors and windows; construction of perimeter walls and foundation to bring the structure up to code; structural modification to meet current earthquake and energy standards (currently, the house is single board wall construction without any insulation); and, roof replacement with a Class A fire rated material and siding replacement with rock and Hardishingles (a fiber-cement product).

We believe that the limited scope of this project is allowed as set forth in your moratorium on water and sewer connections. We request that your board provide a letter verifying that fact so that Mr. Russel may begin processing his permit.

Thank you for your time and consideration.

Sincerely,

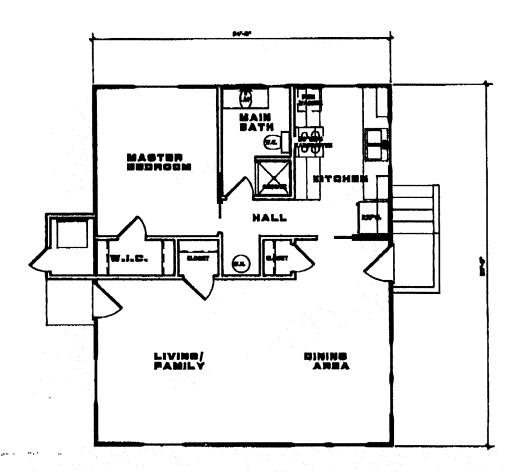

David M. Brown Architect-Agent

ORDINANCE NO.

AN ORDINANCE OF THE BAN SIMBON ACRES
COMMUNITY SERVICES DISTRICT CONTINUING A MORATORIUM
ON THE ISSUANCE OF WATER AND SEMER CONNECTIONS WITHIN
THE BOUNDARIES OF THE DISTRICT

BE IT ORDAINED by the Board of Directors of the San Simeon Acres Community Services District ("District") as follows:

SECTION I. FINDINGS.

The Board of Directors of the District does hereby find, determine, and declare as follows:

- A. There currently exists a serious water quality and quantity problem within the boundaries of the District;
- B. There currently exists a moratorium on new sewer and water connections within the District originally established by Ordinance No. 61 and extended by Ordinance No. 63 to April 1, 1988. The intent of the Board of Directors by this Ordinance is to keep in effect said moratorium after the April 1, 1988, expiration date of Ordinance No. 63;
- C. The water quality and quantity problems of the District pose a current and immediate threat to the health and safety of the people within the District;
- D. The granting of additional water and sewer connections within the District contrary to the provisions of this ordinance would result in an immediate threat to the public health and safety;
- E. The District is diligently pursuing long term supplemental water supplies, but until the time when such supply is available, it is necessary to continue the existing moratorium.

SECTION II. MORATORIUM ON WATER AND SEMER CONNECTIONS.

Except as provided in Section IV of this Ordinance, the District shall shall not allow water and sewer connec-

tions or service on properties located within the boundaries of the District to serve any of the following:

- 1. Any new structure that will require new water or sewer service; or
- 2. Any expansion of an existing structure that will incorporate additional plumbing fixtures; or
- 3. Any expansion of an existing structure that water or sewer.

SECTION III. DURATION OF MORATORIUM.

The provisions of this Ordinance shall remain in effect until repealed. This ordinance supersedes Ordinance No. 63.

SECTION IV. VESTED RIGHT EXEMPTION. The prohibition on new sewer or water connections provided in Section II of this Ordinance shall be inapplicable to projects receiving a vested rights exemption pursuant to Section 4 of District Ordinance No. 65.

SECTION V. CONSTITUTIONALITY.

If any section, subsection, sentence, clause, phrase or portion of this Ordinance is for any reason held to be invalid or unconstitutional by a Court of competent jurisdiction, such decision shall not affect the validity or the constitutionality of the remaining portions of this Ordinance. The Board of Directors of the District hereby declares that it would have passed this Ordinance and each section, subsection, sentence, clause, phrase or portion thereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, phrases or portions be declared invalid or unconstitutional.

SECTION VI. REFECTIVE DATE OF ORDINANCE.

This Ordinance shall be in full force immediately upon passage and within fifteen (15) days thereof shall be

published at least once in a newspaper of general circulation in the County of San Luis Obispo, California.

INTRODUCED, PASSED AND ADOPTED at a regular meeting of the Board of Directors held this 9th of March, 1988, on motion of Director Hoffman , seconded by Director Blankenship , and on the following roll call vote, to-

Beal, Hoffman, Blankenship, Boniface, Price AYES:

TO:

Board of Directors

VIA:

Mark Bloodgood, District Manager

FROM:

John L. Wallace, District Engineer

SUBJECT:

Safety Grating Purchase - Wastewater Treatment Plant

RECOMMENDATIONS:

Staff recommends the Board:

Authorize staff to purchase the new fiberglass reinforced plastic safety grating materials from Harrington Industrial Plastics of Ventura California in the amount of \$3,479.36, which includes tax and shipping costs.

FUNDING:

Currently, funds in the amount of \$5,000 are to be included in the District's Proposed FY 2002-2003 Budget for Safety Improvements - Grating.

DISCUSSION:

The existing steel grating system originally used at the wastewater treatment plant is severely corroded and in some cases missing entirely.

Reinforced fiberglass safety grating has been recommended as the material to select to replace the steel wire mesh. The new grating materials allows staff to cut and install each custom shape found throughout the plant. In addition, the new grating is skid and corrosion resistant.

Staff has solicited quotations from two suppliers of fiberglass reinforced grating materials. The lowest quotation received is Harrington Industrial Plastics in the amount of \$3,479.36.

FROM:

John L. Wallace, District Engineer

SUBJECT:

Final Payment - Ocean Outfall Repair

RECOMMENDATIONS:

Staff recommends the Board:

Approve final payment to Underwater Resources, Inc., in the total amount of \$13,958.05

FUNDING:

Currently, funds in the amount of \$30,000.00 were carried over and are now included in the District's FY 2002-2003 Budget under Item No. S-9 Sewer System Improvements.

The estimated labor cost for the repair of the ocean outfall emergency repair was estimated at \$10,000.00, depending upon weather and surf conditions. The cost to purchase four new diffuser valves was \$4,412.00.

With the additional time required for construction during heavy surf, the total cost for the ocean outfall repair including the new diffusers is \$18,370.05.

DISCUSSION:

Staff has coordinated installation of the four new diffusers and underwater repairs with Underwater Resources, Inc., of San Francisco, California. The goal was to complete the repairs as soon as practicable considering surf/weather conditions. Unfortunately, the contractor experienced heavy surf during the repairs of the outfall and the project took longer than expected. The extra cost associated with the heavy surf conditions and extra time is \$3,958.05.

It is recommended by staff to approve Underwater Resources, Inc., final payment of \$13,958.05.

MEMORANDUM

DATE:

October 9, 2002

TO:

Board of Directors

VIA:

Mark Bloodgood, General Manager

FROM:

John Wallace, District Engineer

SUBJECT:

Proposition 50 Water Bond Initiative

RECOMMENDATIONS:

It is recommended that the Board adopt the attached Board Resolution supporting Proposition 50.

DISCUSSION:

On November 5, 2002, the electorate of California will be asked to vote on Proposition 50, a \$3.44 billion bond initiative. If passed, this initiative will be funded through the sale of general obligation bonds. The proposition will fund a variety of water projects including coastal protection, the CALFED Bay-Delta Program, integrated regional water management, safe drinking water, and water quality projects. Prop 50 was formed by coalitions of Northern and Coastal Counties to pursue funding for water related projects.

A series of regional meetings have been sponsored by this coalition including an organizational meeting for SLO County Communities on September 25, 2002. If Prop 50 is passed, supporters estimate that SLO County participants will share approximately \$15 million to fund local projects. The projects must be feasible, have strong local support and be completed in two years. The SLO County Coalition will be meeting again on October 16, 2002, to have local agencies submit their funding requests of no more than \$300,000. The agencies will then prioritize the funding requests. This list of projects will be sent to the initiative organizers.

A San Simeon Community Services District Resolution endorsing this proposition will help the District establish that there is public support for this initiative and will hopefully justify our District receiving funding for our water projects.

RESOLUTION NO. 02-282

A RESOLUTION OF THE BOARD OF DIRECTORS
OF THE SAN SIMEON COMMUNITY SERVICES DISTRICT
SUPPORTING LEGISLATION AND THE ACTIVITIES OF A COOPERATIVE
COALTION TO ALLOCATE FUNDING FROM FUTURE WATER BOND
INITIATIVES FOR PROJECTS THAT WILL BENEFIT
THE COMMUNITY OF SAN SIMEON, SAN LUIS OBISPO COUNTY AND OTHER
COUNTIES IN NORTHERN AND COASTAL CALIFORNIA

WHEREAS, the California electorate has approved three statewide bond initiatives over the past two years that provided \$6.67 billion for water and parks related programs in California, and an additional bond initiative, Proposition 50, is on the ballet for the November 5, 2002 election that would provide an additional \$3.44 billion if approved by the voters; and

WHERAS, development of a regional coalition to organize and promote local water projects for funding has proven to be effective in obtaining federal appropriations for California and enabling the completion of many beneficial projects; and

WHEREAS, The San Simeon Community Services District has established a list of capital equipment and projects which identifies our water and wastewater needs necessary for the health and safety of our community; and,

WHEREAS, the San Simeon Community Services District has identified the following projects to be consistent with its policy, provide important environmental benefits and warrant state funding as may be provided by future bond initiates:

- Reservoir Line Replacement
- Numerous Maintenance Upgrades System Wide including Water Tank Replacement
- Completion of Water Master Plan Studies including Water Recycling Project

NOW, THEREFORE BE IT RESOLVED that the Board of Directors of the San Simeon Community Services District approves the following actions:

- 1. Supports legislation to allocate funding from future Water Bond Initiatives for local projects in the Community of San Simeon.
- 2. Supports legislation to allocate funding from future Water Bond Initiatives for local projects in San Luis Obispo, Santa Barbara, Sonoma and other Northern and Coastal California Counties.

3. Authorizes the District Manager, or his designee, to work with other public agencies to help develop the Northern and Coastal California Water Bond Initiative Coalition to advocate and secure grant funds for drinking water, wastewater, fisheries, wetlands, water reuse, non-point source and flood control projects that will benefit San Luis Obispo, Santa Barbara, Sonoma County and other counties in Northern and Coastal California.

San Simeon Community Services District - Wastewater Facilities Plan

Draft Report K/J 025004.00

Gentlemen:

As discussed with you through our telephone conversation earlier today, I find that tomorrow I must go to the hospital for some needed surgery. The "rough" estimate is that I will be in the hospital for five days, followed by a couple of weeks of recovery. This unexpected circumstance will intrude on my ability to make a formal presentation to the District Board of our Facilities Plan report in the near future.

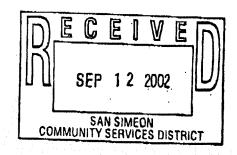

As you know, I have provided you with draft copies of each of the report chapters and have received comments from you as well as comments from the Community Affairs Committee. As a result of these communications, I have made several changes in the original report drafts.

It is still my intent that you, other District Staff and assigned Committee have a final opportunity for input to the Facilities Plan report prior to finalizing for Board review and approval. It is my experience that the best engineering reports and reports that are most helpful are those which have had the most thorough review.

Because of the uncertainty of my schedule, in the meantime I though it would be helpful for you to have a complete copy of the revised report draft to date for your consideration. I leave it to you to decide as to the extent of distribution of this revised report draft for still further review at this time and in anticipation of my return and scheduling of a visit to San Simeon to meet with the District Board, or assigned Committee.

Thank you for your continued assistance in this matter.

SUBJECT:

Conjunctive Use Water Management Plan - October 1996

Enclosed you will find a copy of the **Final Draft for the Conjunctive Use Water Management Plan** for the District, dated October, 1996. I believe this is the document John Wallace was referring to at the meeting on Wednesday. We could not locate a copy in the District Office. Going through some old files, I found that Tim Cleath had done a study for the District in 1996, so I called him. Sure enough, he had a copy of the report in his files and was kind enough to make a copy and drop it off.

If you have any questions, please feel free to give me a call.

Northern and Coastal Water Bond Coalition Project Summary Year 2002 Funding Needs for California Counties

County:

San Luis Obispo

Entity Applying:

San Simeon Community Services District

c/o John L. Wallace & Associates (805) 544-4011

Project Title:

Project No. 1 - Recycled Water Project

Project category (drinking water, wastewater, fisheries, wetlands, water reuse, non-point source, flood control):

Wastewater - Recycling Augmentation of Potable Water Supply

Project goal and benefit (purpose, significance, importance, and relevance):

- Provide an alternative water supply to the community
- Defer the use of potable water currently being used for irrigation
- Landscape areas including Caltrans Freeway to enhance the community and eliminate need to truck water for landscape irrigation.
- Study cooperative project with State Parks for further expansion of use of recycled water for Hearst Monument Visitor's Center

(see attached excerpts from adopted Water Recycling Planning Study)

Project Summary (brief description in bulleted format, identifying key elements of the project):

• Phase – 1 Secondary Reuse System; subsurface irrigation; freeway landscape irrigation

\$100,000

• Expansion of District wide use of recycled water

\$600,000 \$700,000

San Simeon, CA 93452

Board Members:

In accordance with the Plan of Study dated January 1998, JLWA has prepared this report delineating the conclusions reached as a result of the recently completed Water Recycling Facilities Planning Study. The study presents a review of the following items:

- Study Area Characteristics;
- Water Supply Characteristics & Facilities;
- Waste Water Characteristics & Facilities;
- Treatment Requirements for Discharge and Reuse;
- Recycled Water Market;
- Project Alternatives Analysis;
- · Recommended Plan; and
- Construction Finance & Revenue Program.

If you have any questions, or require additional information, please contact me at (805) 544-4011.

Sincerely,

JOHN L WALLACE & ASSOCIATES

Steven G. Tanaka, P.E.

Senior Engineer

cdm:084.02.1h2oltr2

Executive Summary

Background

The San Simeon Community Services District (District) serves the customers within its 100-acre community. The District provides water and sewer services to its estimated 250 permanent residents, up to 460 combined permanent and seasonal residents, and to local motels and businesses that support the community and tourism in the area. For the last 12 years, there has been a moratorium on building due to the unavailability of additional water in the service area.

Water Demand

In 1999, the District pumped and distributed approximate 97 acre-feet of water to customers within its service area. Water allocation for the local Pico Creek aquifer is 148 AFY. However, prior studies have indicated that safe annual yield of the Pico Creek aquifer is approximately 120 AFY. Furthermore, the quality of this water in drought years has tended to decline at a production rate of 75 AFY.

Water Quality

The District's well water supply is of good mineral quality, with a total dissolved solids (TDS) concentration of around 400 mg/L. From an agronomic standpoint, the District's wastewater quality is considered good to moderate, and suitable for landscape irrigation purposes.

Wastewater Quality and Quantity

The District currently treats approximately 84 AFY of wastewater, all of which is essentially available for reuse. The District's effluent currently meets the criteria for "Secondary - 23 Recycled Water", with a TDS concentation of around 1,100 mg/L. Acceptable uses within the District service area, with the current effluent quality, include irrigation of freeway landscaping, and subsurface irrigation of landscaping.

Wastewater Treatment Plant Upgrade

A tertiary upgrade to the District's existing treatment plant will be required in order to allow un-restricted use of treated wastewater. The treatment plant has sufficient room to accomplish the upgrade, and the associated cost for the upgrade will be approximately \$200,000.

Secondary Recycled Water Market

The secondary effluent quality recycled water market in the District's service area includes landscape irrigation of Caltrans right-of-way, and subsurface irrigation of landscaping at

local condominiums and commercial establishments. This demand is estimated to be 6 AFY, or 6 percent of the current water demand.

Tertiary Recycled Water Market

If tertiary recycled water quality is achieved, the market will expand to surface spray irrigation of lawns within the District service area, irrigation at the Hearst State Monument and Beach Park, toilet flushing, and groundwater recharge of the Pico Creek aquifer. This demand is estimated to be as high as 69 AFY for all irrigation including Hearst Monument/State Park, and 81 AFY for all irrigation demands, and including groundwater recharge.

Alternatives Considered

The alternatives are developed based on implementation of Phase 1 and Phase 2 projects. Phase 1 includes identified demands for secondary effluent reuse, that will not require further treatment at the District's wastewater plant. Phase 2 alternatives include the use of tertiary effluent and the required necessary wastewater treatment plant improvements. These alternatives are described as follows:

- 1. Phase 1 (Secondary effluent) Alternatives:
 - **Alternative 1-1.** Subsurface Irrigation of Existing Cavalier Motel Landscaping.
 - Alternative 1-2. Subsurface Irrigation of Existing Cavalier Motel Landscaping, plus Caltrans median only.
- 2. Phase 2 (Tertiary effluent) Alternatives:
 - Alternative 2-1. Landscape Irrigation of San Simeon, including irrigation (unrestricted use) of all motels and condominium complexes.
 - Alternative 2-1. Alternative 2-1 Demands, plus Toilet Flushing at New Motels.
 - **Alternative 2-3.** Alternative 2-2 Demands, plus Hearst Monument and State Beach Park.
 - Alternative 2-4. Groundwater Recharge and Augmentation of Pico Creek aquifer.

The costs of the various alternatives considered are summarized in the following table:

Summary of Recycled Water Alternative Costs

Project Phase	Alternative	Capital Cost, \$b	Cost, \$/AFY	
Phase 1, Secondary	1-1. Cavalier Motel	\$ 72,000	\$ 4,600	
Reuse Water	1-2. Cavalier Motel and Caltrans	\$ 74,000	\$ 1,600	
	2-1. Entire District Service Area	\$ 680,000	\$ 5,400	
Phase 2, Tertiary Reuse Water	2-2. Alt. 2-1 plus toilet flushing ^a	\$ 820,000	\$ 2,500	
	2-3. Alt. 2-2 Plus Hearst Monument	\$ 1,875,000	\$ 3,400	
	2-4. Alt. 2-1 plus GW Recharge	\$ 930,000	\$ 7,900	

^a Costs do not include dual plumbing costs.

Recommendations

The recommended plan for San Simeon is a two-step development plan for water recycling in the area. San Simeon recognizes the need for a water recycling project, and as such, has already installed some of the required infrastructure for the recycled water distribution system to serve the District.

Phase 1 Implementation Plan

The first phase of the recommended project should include the implementation of recycled water irrigation with secondary treated wastewater from the current wastewater treatment plant. This is referred to as Alternative No. 1-2 in Chapter 6, which involves recycled water irrigation at the Cavalier Motel, and the Caltrans right-of-way. The design of the required distribution system and pumping station will be relatively easy and quick to complete, and there are no treatment plant improvements needed as part of this first phase of the project. Thus, this plan can be fully implemented within 15 months from project inception. The project should be implemented for start-up by spring to summer of 2002, to take advantage of the summer 2002 irrigation season.

^b Year 2000 dollars.

Phase 2 Implementation Plan

The Phase 2 implementation of this overall recycled water plan should include a tertiary upgrade of the wastewater treatment plant, and expansion of recycled water service to the District service area, including toilet flushing of any new motel development in San Simeon. Further detailed studies should be performed at existing motels to determine if Owners are willing to participate in a retrofit program, and to determine if it is economically viable to serve any of these existing establishments with recycled water for toilet flushing. This Phase 2 component of the overall project should commence in the winter of 2002, for project implementation by the spring of 2004.

A conceptual implementation schedule for Phase 2 is as follows:

Prepare Project Report for tertiary treatment plant upgrade and Distribution System Expansion for SRF Funding: 6 months	ths
Design tertiary treatment plant upgrade and Distribution System Expansion (includes permitting) including SRF Loan Approval:	ths
Construct Tertiary Treatment Plant and Distribution System Expansion (including on-site retrofits):	ths
System Startup and User Orientation and Training: 1 mor	nth
TOTAL PHASE 2 PROJECT SCHEDULE:	ths

Future Considerations

Once the second phase of the recycled water project is implemented, further study should be conducted at that time to verify if groundwater recharge to the Pico Creek aquifer is viable. Additional evaluation and funding options to serve Hearst State Park should also be re-evaluated in the future. Although the economic analysis indicates that recycled water service to Hearst Monument is costly at this time, with the continued limited water resources available in the area, service to Hearst Monument and the State Beach Park may soon become economically viable, and very attractive from a non-economic standpoint.

Financial Plan and Revenue Program

The financial plan assumes that the initial Phase 1 debt service is retired within 3 years, since the capital expenditure is minimal. After the third year, when Phase 2 of the project is implemented, that debt service for the treatment plant expansion and distribution system improvements, are retired over a 20 year period. Based on this plan, cash flow will be negative until such time that the debt service for the Phase 2 project is retired in Year

2024. In Years 2001 through 2023, the negative cash flow must be funded through other District funds, presumably from potable water revenues.

Chapter 1 - Study Area Characteristics

A. History

The San Simeon Community Services District (District) is a community services district organized under Section 61600 of the Government Code of the State of California. Historical records indicate that the District is comprised of land officially known as San Simeon Acres, and as such, was part of the Rancho San Simeon (see Figure 1-1 Location Map) later sub-divided in 1952 by approval of the San Luis Obispo Planning Commission. The sub-division streets were "red-rocked" and water lines serving the parcels were installed soon thereafter.

Building commenced and continued through the years and by 1961 the District was formed and a wastewater treatment plant constructed. Refer to Figure 1-1 for a Location Map showing the San Simeon area.

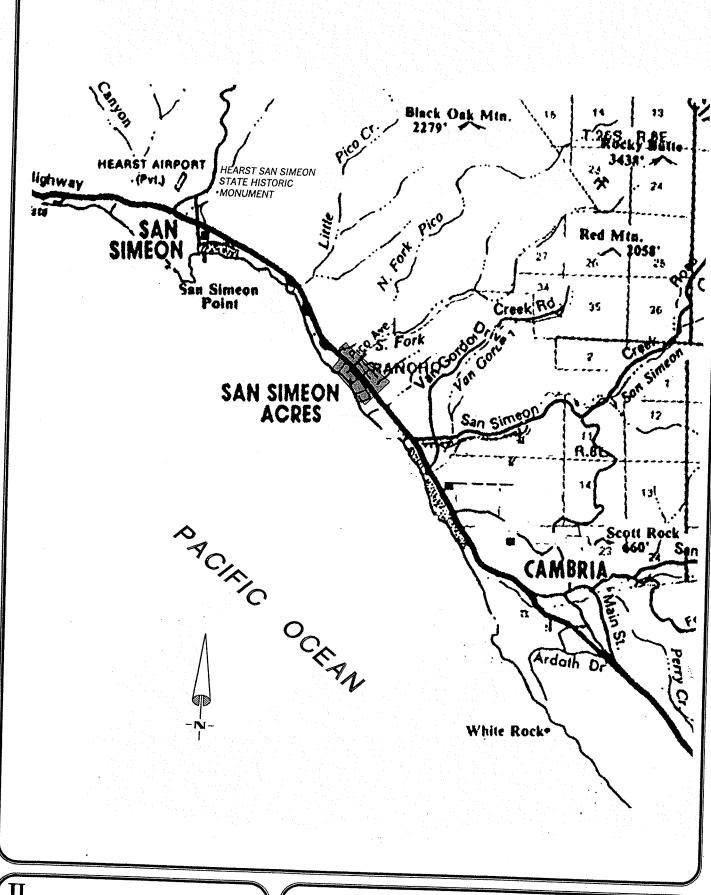

Development continued to its present level in the years following; however, for the last 12 years, there has been a moratorium on building due to the unavailability of additional water.

B. Community Character

San Simeon is situated on the Pacific Ocean approximately 65 miles south of Big Sur and 8 miles north of Cambria. It is an approximately 100 acre site that has only three zoning categories: 1) commercial; 2) public facilities; and 3) multi-family (see Figure 1-2, Potential Build-out Map). It is closely contained geographically on both sides of U.S. Highway 1 as it heads north to Big Sur and eventually Monterey. The Highway divides the area approximately in half. Both halves are similar in land use and composition.

The primary economic engine in the village is tourism. There are numerous gift and curio shops along with several motels and restaurants located in the area. The primary tourist attraction is Hearst Castle which lies several miles to the north. Residences are relatively limited in number and vary from single family residences to apartments and small multi-unit residential resorts.

San Simeon is not an incorporated city, rather it is an urbanized area within the County of San Luis Obispo. The area is defined by the County as being within the San Simeon Village Reserve Line. Related County regulations are in effect within the area.

ALTERNATIVE 2-4

SAN SIMEON COMMUNITY SERVICE DISTRICT

FIGURE 6-5

B. Evaluation of Alternatives

This subsection discusses the evaluation of each of the alternatives considered. Refer to Appendix C for cost backup information. The cost of potable water without depreciation is approximately \$1,700/AF. When factoring in annual capitol expenses and depreciation, the cost can range from \$3,200/AF to \$4,000/AF. It is estimated that secondary and tertiary effluent will realize \$1,900/AF in revenue from the users, which is approximately 90 percent of the potable water rate. This is considered the "break-even" cost for potable water in the service area. Also, present worth and annualized costs are based on a discount rate of 5 percent, and a project life of 20 years.

Alternative 1-1. This alternative involves serving Cavalier Motel using secondary effluent. Thus, there will be no need to upgrade the treatment facilities to provide tertiary water. New PVC distribution and irrigation piping will be required from the treatment plant, to the Cavalier Motel. However, the existing pipe bridge has a recycled water pipeline already installed in it. Peak hourly flow is expected to be much lower than conventional turf irrigation, given that irrigation will be accomplished by subsurface drip. Thus, a 10 to 20 gpm pump should be sufficient to serve this customer. It is assumed that costs to the User for retrofit of the subsurface irrigation system are to be borne by the User. The Cavalier Motel irrigated area is assumed to be no larger than 2 acres, and annual demand is estimated to be 2 AFY/acre.

Advantages:

• The existing treatment plant will not require upgrade to meet tertiary water quality standards.

Disadvantages:

- The estimated annual usage of recycled water is estimated to only be approximately 2 AFY, or only 2 percent of the current annual demand.
- The estimated cost to deliver secondary recycled water to the Cavalier Motel is estimated to be approximate \$4,600/AF.

Alternative 1-2. This alternative involves serving Cavalier Motel and the Caltrans median strip, using secondary effluent. Thus, there will be no requirement for upgrading the treatment facilities to provide tertiary water. New PVC irrigation piping will be required from the treatment plant, to the Cavalier Motel. It is believed that some piping has been installed in the Caltrans right-of-way. The alternative will require the installation of a 150 gpm pump station to be located at the treatment plant. It is assumed that costs to the User for retrofit of the subsurface irrigation system are to be borne by the User. The Cavalier Motel irrigated area is assumed to be no larger than 2 acres, and annual demand is estimated to be 2 AF/AY. Caltrans demand is also estimated to be 2 AFY.

Advantages:

- The existing treatment plant will not require upgrade to meet tertiary water quality standards.
- The estimated cost to deliver secondary recycled water to the Cavalier Motel and Caltrans is attractive, at approximately \$1,600/AF.

Disadvantages:

PROJECT TWO 0084-0002.ss.doc

Proposition 50 Project Considerations

The San Simeon Community Services Board unanimously passed a resolution supporting Proposition 50 on October 9, 2002 Project Two

Public Health Issue: Project Two will correct the water distribution system deficiencies of the San Simeon Community Services District (District). The water line upgrades will increase flows and looping will provide safe water to the community.

Public Safety: Public safety will be assured by replacing unsafe and inadequate water lines. Dead end lines will be looped which will increase water flow rates and circulation, decreasing potential for bacteria growth in dead end lines.

Regulatory Compliance: The funding of this project will enable the District to continue to provide clean water of good quality and maintain compliance with government regulations.

Match for another source of funding: The District has established a list of capital improvement projects which have been budgeted in the upcoming years. These funds can be matched with bond funding for maximum effectiveness.

Small Community: The community of San Simeon has a population of less than 500 full time residents. However, visitor population can reach 4,000 on peak weekends. The District is a "visitor serving" community with a very modest tax base.

Multiple Organizations: The District maintains a close relationship with its neighbors including the Chamber of Commerce and State Parks, and maintains an emergency water source agreement.

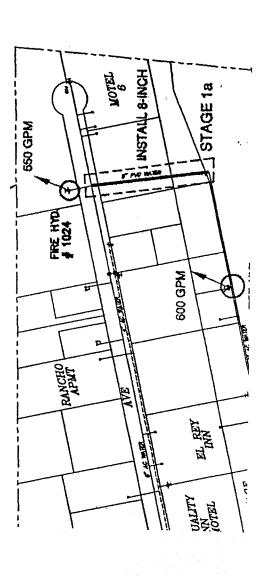

Enhances Wildlife Habitat: San Simeon is an one hundred acre community located on the Pacific Ocean. It is surrounded by environmentally sensitive areas both on and off shore. The most effective way of maintaining the environment of our pristine location is by maintaining an adequate and safe water system for benefit of county residents and visitors.

Improves Water Quality: This project will allow our District to maintain its water system to meet modern standards. The new water lines will provide a clean and adequate water source for the community for years to come.

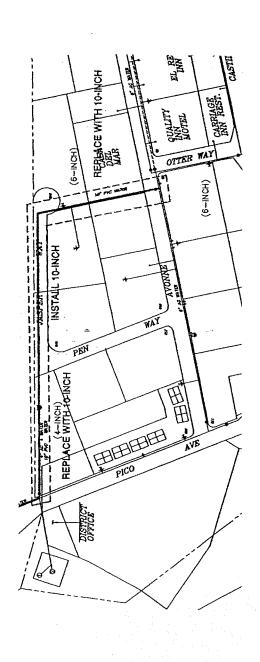

System Reliability: Low fire flows, inadequate pressure, and substandard pipelines are a source of high maintenance costs and health risks. These deficiencies will be reduced with the improvements allowed by this project.

Part of an Adopted Plan: For years the District has been anxious to study and improve its water system. Funds have been set aside each year to maintain the system, but resources are limited. Grant funds can be used immediately and effectively because the District has adopted annual capital improvement and budget plans.

Northern and Coastal Water Bond Coalition Project Summary Year 2002 Funding Needs for California Counties

County:

San Luis Obispo

Entity Applying:

San Simeon CSD

c/o John L. Wallace & Associates (805) 544-4011

Project Title:

Project No 3 Water Master Plan and Water Tank Replacement

Project category (drinking water, wastewater, fisheries, wetlands, water reuse, non-point source, flood control):

Drinking Water

Project goal and benefit (purpose, significance, importance, and relevance):

The Water Master Plan will define San Simeon's deficiencies with the existing water system and future storage needs. The District will use it as a tool to prioritize projects and upgrades. The water tank replacement will assure safe and adequate water delivery to the community.

Project Summary (brief description in bulleted format, identifying key elements of the project):

• Develop Water Master Plan \$25,000

\$400,000

Project Status (feasibility study? planning? design? construction? other?):

System Analysis and Construction

Collaborative partners:

N/A

Project timeline:

Two Years

Water bond funding request:

\$150,0000

Local/other funding committed:

San Simeon CSD Funding \$250,000

Total cost:

Water Bond and CSD Funding \$400,000

Proposition 50 Project Considerations

The San Simeon Community Services Board unanimously passed a resolution supporting Proposition 50 on October 9, 2002 Project Three

Public Health Issue: Project Three will identify and correct the water storage and distribution system deficiencies of the San Simeon Community Services District (District). The upgrades will increase flows and storage to provide safe water to the community.

Public Safety: Public safety will be assured by replacing an inadequate water tank. Current storage is inadequate to meet CDF standards.

Regulatory Compliance: The funding of this project will enable the District to continue to provide clean water of good quality and maintain compliance with government regulations.

Match for another source of funding: The District has established a list of capital improvement projects which have been budgeted in the upcoming years. These funds can be matched with bond funding for maximum effectiveness.

Small Community: The community of San Simeon has a population of less than 500 full time residents. However, visitor population can reach 4,000 on peak weekends. The District is a "visitor serving" community with a very modest tax base.

Multiple Organizations: The District maintains a close relationship with its neighbors including the Chamber of Commerce and State Parks, and maintains an emergency water source agreement.

Enhances Wildlife Habitat: San Simeon is an one hundred acre community located on the Pacific Ocean. It is surrounded by environmentally sensitive areas both on and off shore. The most effective way of maintaining the environment of our pristine location is by maintaining an adequate and safe water system for benefit of county residents and visitors.

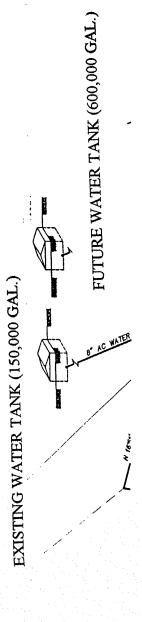

Improves Water Quality: This project will allow our District to maintain its water system to meet modern standards. The new water tank will provide adequate water storage for the community for years to come.

System Reliability: Low fire flows, inadequate pressure, and substandard pipelines are a source of high maintenance costs and health risks. These deficiencies will be reduced with the improvements allowed by this project.

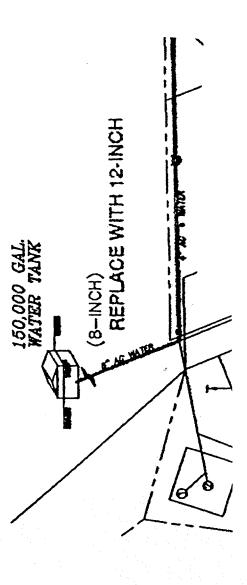

Part of an Adopted Plan: For years the District has been anxious to study and improve its water system. Funds have been set aside each year to maintain the system, but resources are limited. Grant funds can be used immediately and effectively because the District has adopted annual capital improvement and budget plans.
